Educational Philosophy4
Welcome from the Campus President5
A Letter from the President & CEO5

Introduction

■ Our Mission

Lincoln's mission is to provide superior education and training to our students for in-demand careers in a supportive, accessible learning environment, transforming students' lives and adding value to their communities.

■ History

Nashville Auto-Diesel College was established in 1919 by Mr. H.O. Balls. Our first course of training was auto mechanics. In those days, the training was primitive in some ways. We had to teach driving. Our training was also advanced. For example, in electricity we taught Ohm's Law, starting with the structure of the atom. Our 1920 catalog was a leaflet. It contained testimonial letters from graduates expressing appreciation for helping them get a job. Originally students came from close to Nashville, but Mr. Balls realized he would soon saturate the market with graduates, so he began to advertise in publications such as Popular Mechanics and Popular Science. By the mid-twenties, we received our first foreign student and also our first rehabilitation student. Our market area was gradually expanded to all states and 62 foreign countries.

In 1935, we included the diesel engine in our course. In 1946, we added Collision Repair and Refinishing Technology (body and fender). In our history we have also taught Radio Repair, Refrigeration, and Air Conditioning. We have performed three group-training programs for the Federal Government.

- 1,296 men for Army Ordnance during WWII
- 500 Air Force mechanics in the Korean War
- 57 foreign students sponsored by the U.S. Department of State under the Point Four Program of President Truman

We have been approved for the training of veterans since 1946 and have trained thousands of veterans from 1946 to the present. About 30 states use our school for the training of the disabled through vocational rehabilitation.

In 1987, we established a Graduate Hall of Fame and believe that we are the first college in the United States to establish a Graduate Hall of Fame to honor outstanding graduates.

In February 2003, NADC was acquired by Nashville Acquisition, L.L.C., a subsidiary of Lincoln Educational Services Corporation.

In September 2011, Nashville Auto-Diesel College became a branch campus to Lincoln College of Technology, Indianapolis, Indiana.

As a result of goals established in the long-range strategic plan for our institute(s) and its parent corporation, Lincoln Educational Services (LESC), Nashville Auto-Diesel College changed their name to Lincoln College of Technology on September 1, 2012.

Lincoln Educational Services Corporation is a leading provider of diversified career oriented post-secondary education. Lincoln offers recent high school graduates and working adults degree and diploma programs in five principle areas of study: health sciences, automotive technology, skilled trades, hospitality services and business information technology. Lincoln has provided the workforce with skilled technicians since its inception in 1946.

Lincoln Educational Services Corporation currently operates over 20 campuses in 14 states under 3 brands: Lincoln College of Technology, Lincoln Technical Institute, and Euphoria Institute of Beauty Arts and Sciences.

■ Historic Administration Building

If you happen to be looking at either of two books titled, *NASHVILLE—A Short History and Selected Buildings or Images of America, East Nashville*, you will see our Administration Building listed.

This property was given to Zachariah Stull, Pennsylvanian, as a Revolutionary War grant. He built a log house and later built this house for his granddaughter, Mary Anne Stull, who married Edwin Hewitt Childress. Their grandson, George Stull Childress, sold the property to James C. Warner for a summer home about 1886. Mr. Warner's son, Percy Warner, later developed the extensive grounds with gardens and an aviary. The interesting and beautiful collections of birds, featuring pheasants principally from Africa, were later given to Glendale Park. The Warner's sold Renraw (the name "Warner" spelled backward) about 1912 and moved to Royal Oaks on Harding Road. The house was remodeled and is our Administration Building.

■ Educational Philosophy

In preparing the whole person for a changing world, Lincoln College of Technology is dedicated and committed to providing an up-to-date, high-quality, and enriching instructional program, designed for serious-minded students in quest of excellence in education.

The philosophy of the College extends beyond the teaching of technical proficiencies and practical knowledge. Each and every member of the student body is cared for, recognized, and respected. Concern for individual needs, abilities, and interests is the hallmark of our philosophy of education.

We believe the fundamental purpose of education is to help individuals to develop fully, to help instill them with ideals and attitudes, to enhance their ability to adapt to variations and differences, and to enable them to make a definite contribution to society.

We believe that education augments the moral worth and dignity of all individuals and broadens their intellectual horizons, affording them greater opportunities for living a more meaningful and productive life.

We believe that an individual learns as a total person and that learning requires self-activity, discipline, and skill-mastery practices on the part of the learner.

We believe education means growth in purpose and self-direction. Students should grow to feel that their destinies are within their own control.

We believe that the time-honored values of truth, honesty, consideration, sincerity and the putting forth of one's best effort at all times promote a sense of "esprit de corps" within our school community.

Introduction

■ Welcome from the Campus President

Welcome to Lincoln College of Technology, Nashville, Tennessee, where we have been training professionals for the transportation industry almost since the dawn of the automotive era. I am very excited that you have chosen LCT as a means to realize your career objectives. Since 1919, LCT has distinguished itself by offering training as the benchmark for postsecondary education in the Automotive, Truck, Heavy Equipment, and Collision Repair and Refinishing industries.

At LCT we understand that both technical proficiency and strong communication skills are essential in this highly advanced and rapidly changing industry. LCT assists

students with both “job seeking skills” as well as “job keeping skills” during their time with us. The success of this college can truly be measured by the success of our graduates. The establishment of world class professionalism is the goal for every quality technician in the 21st Century.

Thank you for beginning your career with Lincoln College of Technology. We look forward to your joining over 52,000 other individuals who have partnered with us as they have developed into industry professionals. I am glad that you picked LCT as your “First Choice” in the start of your new career.

Sincerely,

A handwritten signature in black ink that reads "C Biddle". The signature is written in a cursive style and is positioned above a light grey rectangular background.

Christopher J. Biddle
Campus President

■ A Letter from the President & CEO

We believe education and training increase your self-esteem and enable you to work in a rewarding and satisfying career. In order to achieve our high educational standards, we carefully select qualified instructors that offer competency and experience, as well as a caring commitment to each student's success.

In the development of curricula, we continuously monitor the current industry standards and update our courses regularly to reflect change in the employment trends. Our classrooms offer industry standard equipment that simulates the workplace as closely as possible.

In addition to careful and detailed instruction, faculty, staff and administration provide ongoing support and encouragement. You gain *skills and confidence* at LCT, so you can achieve success here and in other areas of your life.

It is our desire to provide you with the ability and awareness to be of value in a technologically changing world. Your education and training here will be enriching, relevant and empowering. In a very short time, you can become a well-rounded, capable employee in the professional or technical field you choose.

Sincerely,

A handwritten signature in black ink that reads "S. Shaw". The signature is written in a cursive style and is positioned above a light grey rectangular background.

Scott M. Shaw
President & Chief Executive Officer

Accredited Master Automobile Service Technology

What does ASE Master Accreditation Mean?

ASE is the National Institute for Automotive Service Excellence and established by the automotive industry to improve the quality of vehicle repair and service through testing and certification. The ASE Education Foundation is a foundation within the ASE organization. ASE Education Foundation's mission is to improve the quality of automotive technician training programs through voluntary accreditation. ASE Education Foundation is responsible for the evaluation process, and makes recommendations for ASE program accreditation based on their evaluation. To achieve Master accreditation, a program must pass an evaluation in all eight (8) automobile related areas:

1. Brakes
2. Electrical/Electronic Systems
3. Engine Performance
4. Suspension and Steering
5. Automatic Transmission and Transaxle
6. Engine Repair
7. Heating and Air Conditioning
8. Manual Drive Train and Axles

How did our Automotive program become ASE Master Accredited?

This campus underwent an extensive on-site ASE Education Foundation review process conducted by an independent evaluation team. The team evaluated the program against standards to include administration, learning resources, finances, student services, instruction, equipment, facilities, instructional staff, and cooperative agreements. Following the completion of this evaluation, the team leader submitted their recommendation to ASE for accreditation. This campus met compliance in all areas and was awarded accreditation for Master Automobile Service Technology designation.

Are our Instructors ASE Certified?

Yes, all of our automotive instructors are required to actively hold the ASE G1 and A6 Certifications and be ASE certified in the areas they teach.

How do our Graduates benefit from an ASE Master Accredited program?

To become ASE Certified, a person must meet a minimum level of related work experience and pass ASE certification examinations. A graduate from our ASE Automotive Technology Program may be eligible to substitute the training for up to one year of work experience. For additional information, please visit the ASE website.

Automotive Service Technology

AUXX100—DIPLOMA PROGRAM

DAY/AFTERNOON/EVENING PROGRAMS

total instructional hours 1320
 total semester credits hours* 55
 weeks to complete (day/aft/eve) approximately 57 (including holidays and scheduled breaks)

***The listing of credit hours is not meant to imply that credits can be transferred into college or other private career school programs. Transfer credits are at the sole discretion of the receiving school.**

program objective

Provide the graduate with the entry-level knowledge and skills required to correctly test, diagnose, replace, repair and adjust as necessary the components of the mechanical, electronic, hydraulic, and accessories systems on current automobiles. Upon completion of this program, the graduates will be qualified for entry into the automotive service career field as a technician capable of analysis, problem solving, performing most common service operations and under supervision, more specialized or involved tasks with a dealer, independent shop or other service outlet.

In addition to the technical training, a critical aspect of a Lincoln education is developing the professional skills that are required by our employers. Students will

need to demonstrate skill proficiency through a series of professional development activities and seminars which are integrated into each course. The modules include:

- Student Success
- Financial Literacy
- Professional Development
- Career Success

Students will be required to complete out-of-class assignments in each course.

program objective

Students enrolled in, or who choose to transfer to, the Automotive Service Technology with Mopar program must maintain a minimum cumulative GPA of 2.50 throughout the length of their training. Students must also maintain a 90% or better attendance record. Failure to maintain these standards may result in the student's inability to continue participating in the program. Those

students who are no longer eligible to participate in the Mopar program may be allowed to continue fulfilling the requirements necessary to graduate from the Automotive Service Technology diploma program. Students will be required to complete out-of-class assignments in each course.

***The listing of credit hours is not meant to imply that credits can be transferred into college or other private career school programs. Transfer credits are at the sole discretion of the receiving school.**

program objective

This program is designed to prepare students for entry into the diesel and truck career field. Students enrolled in this program will learn theory, functions, diagnostics, and repair of diesel engines and natural gas fuel systems. Using industry standard tools and equipment, students will diagnose and repair electrical, mechanical, and fuel delivery systems on diesel engines, trucks, and trailers. Upon successful completion of the program, the graduate should possess knowledge and versatility in the diesel and truck repair field to qualify for entry-level positions as a mechanic, technician, mechanic's helper, or a fleet service technician in truck dealerships, fleet maintenance departments, private repair enterprises, or franchised truck repair organizations.

In addition to the technical training, a critical aspect of a Lincoln education is developing the professional skills that are required by our employers. Students will need to demonstrate skill proficiency through a series of professional development activities and seminars which are integrated into each course. The modules include:

program objective

This program is designed to provide the student with a comprehensive understanding and hands-on application of industry standard collision repair and refinishing techniques. The program also provides information on the latest collision repair tools, equipment, and techniques as well as important safety tips and strategies for students to use in protecting themselves and the environment.

It offers an insight into what it takes to become a successful, well-rounded collision repair technician. Graduates of the “Collision Repair and Refinishing Technology” program will

be presented with the basic skills and knowledge that an entry-level technician needs to obtain employment in the collision industry. Upon graduation, the student will be qualified to work in a shop that repairs conventional and unitized bodies using various manufacturers frame, alignment, and paint equipment. This program is structured to prepare the student for I-CAR Pro Level 1 Certifications in both the Non-Structural and Refinish areas along with preparation for I-CAR steel and aluminum welding certifications.

Students will be required to complete out-of-class assignments in each course.

CIP CODE: 47.0603 • SOC CODE: 49-3021

Note: Course numbers and sequences are listed here for reference only. The actual delivery sequence of courses contained in this program may vary depending upon scheduling needs.

Mode of Delivery: Residential, Blended Learning or Online are the methods we may use to deliver content in each course. The Residential courses are offered on ground at the campus. Blended courses are offered by delivering a fraction of the course in an online format as well as traditional face to face method. Online courses are delivered 100% online. The Blended delivery and online delivery plan will implement distance education activities into each course in the program of study. The use of simulations, case studies, assessments and multimedia will be used to enhance the students understanding of the learning objectives outlined in the course syllabus.

Welding and Fabrication Technology

WLDX100—DIPLOMA PROGRAM

DAY/AFTERNOON/EVENING/WEEKEND PROGRAMS

total instructional hours 720
 total semester credit hours* 30
 weeks to complete (day/aft/eve/wknd) . . . approximately 32 (including holidays and scheduled breaks)

*** The listing of credit hours is not meant to imply that credits can be transferred into college or other private career school programs. Transfer credits are at the sole discretion of the receiving school.**

program objective

The Welding and Fabrication Technology program prepares students for entry level welder positions as structural welders. Students develop key fundamental skills during the initial courses and learn to apply these skills using different and more complex welding procedures. The welding procedures include Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW/MIG), Flux Core Arc Welding (FCAW), and Gas Tungsten Arc Gas Welding (GTAW/TIG). Using each of these procedures, students learn to weld plate in various positions including horizontal, vertical, and overhead. Students also learn various techniques for cutting and preparing metal for welding procedures.

Upon successful completion of all components of this program, the graduate should possess the working knowledge and skills to qualify as a structural welder using any one of three standard welding processes in construction, fabrication, or plant maintenance work

settings. Students should be able to successfully complete pre-qualification tests for any construction or structural related projects.

In addition to the technical training, a critical aspect of a Lincoln education is developing the professional skills that are required by our employers. Students will need to demonstrate skill proficiency through a series of professional development activities and seminars which are integrated into each course. The modules include:

- Student Success
- Financial Literacy
- Professional Development
- Career Success

Students will be required to complete out-of-class assignment in each course.

 weeks to complete (day/aft/eve) approximately 83 (including holidays and scheduled breaks)

***The listing of credit hours is not meant to imply that credits can be transferred into college or other private career school programs. Transfer credits are at the sole discretion of the receiving school.**

program objective

This degree is designed to provide the student with a comprehensive understand and hands-on application of industry standard automotive repair and service techniques. The program also provides information on the latest automotive repair tools, diagnostic and service equipment, and techniques as well as important safety, personal protection, and hazardous material handling strategies for students to use in protecting themselves and the environment. Graduates of this degree program will be presented with the entry-level knowledge and skills required to correctly test, diagnose, replace, repair and adjust as necessary the components of the mechanical, electronic, hydraulic, and accessories systems on current automobiles. Upon graduation, the student will be qualified for entry-level positions in the automotive service career field as a technician capable of analysis, problem solving, performing most common service operations and under supervision, more specialized or involved tasks with a dealer, independent shop or other service outlet. The general education component will provide the student

with the communication, business, and critical thinking skills necessary to pursue other employment opportunities within the industry.

In addition to the technical training, a critical aspect of a Lincoln education is developing the professional skills that are required by our employers. Students will need to demonstrate skill proficiency through a series of professional development activities and seminars which are integrated into each course. The modules include:

- Student Success
- Financial Literacy

* The listing of credit hours is not meant to imply that credits can be transferred into college or other private career school programs. Transfer credits are at the sole discretion of the receiving school.

program objective

An Associate Degree will be awarded upon completion of this program. The program is designed to prepare students for entry into the diesel and truck or heavy-duty and off-road equipment career field. Students enrolled in this program will learn theory, functions, diagnostics, and repair of diesel engines, truck systems and off-road equipment system units. Utilizing industry standard tools and equipment, students will diagnose and repair electrical, mechanical, hydraulic, drive train, steering, and suspension systems on trucks and heavy-duty and off-road equipment. Upon successful completion of the program, the graduate should possess knowledge and versatility in the diesel/truck and heavy-duty off-road equipment service and repair industry to qualify for entry-level positions in either truck or heavy-duty and construction equipment dealerships, fleet and equipment maintenance facilities as well as independent service and repair enterprises.

In addition to the technical training, a critical aspect of a Lincoln education is developing the professional skills that are required by our employers. Students will need to demonstrate skill proficiency through a series of professional development activities and seminars which are integrated into each course. The modules include:

■ Course Numbering System

100 LEVEL COURSES

These are courses that may or may not have prerequisites defined and normally are offered to the student during the learning process in the first academic year.

200 LEVEL COURSES

These are courses that may or may not have prerequisites defined and normally are offered to the student during the learning process in the second academic year.

■ Collision Repair Courses

CR101B—INTRODUCTION TO COLLISION REPAIR

100 Contact Hrs (80 Lecture, 20 Lab/Shop); 4.5 Credits

This course is a detailed introduction to collision repair. Topics to be taught include proper tools and equipment, worker safety, vehicle construction, vehicle systems, diagnosing damage, determining repair or replacement of components, estimating the cost of repairs, corrosion protection, and repair materials and procedures.

Students learn basic surface preparation procedures such as rough sanding, feather edging, fine sanding, priming and finish sanding. Students also learn to mask and tape for spot repairs and complete paint jobs. Students learn how to analyze and repair damaged metal panels using body hammers, dollies, and paint-less dent repair techniques. Students also learn how to repair panels by patching, welding, using fiberglass, and chemicals. Students will learn how to remove, replace, and properly align cosmetic panels.

Students learn the proper washing, defect removal, and finishing procedures of a complete vehicle detail. Students also learn how to repair and replace vinyl vehicle roofs.

Prerequisite(s): None

CR102B—STEEL WELDING TECHNIQUES AND PROCESSES

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course is an introduction to welding as it pertains to the collision repair and refinishing industry. The student will learn the necessary safety precautions as required for cutting and welding. Students will learn how to inspect and test a MIG, TIG, and resistance spot-welds. The student will learn how to weld with both MIG and TIG welders plus use various related equipment. Students will also be able to demonstrate plasma arc cutting as well as oxyacetylene cutting. During this class the student will demonstrate the proper procedures for welding and fabricating components in a live shop.

Prerequisite(s): None

CR103B—STRUCTURAL I

100 Contact Hrs (80 Lecture, 20 Lab/Shop); 4.5 Credits

This course is designed to teach students how to measure, straighten, and replace steel and aluminum panels including point-to-point measuring and three dimensional measuring equipment and its operation. The student will learn the basic construction of uni-body vehicles, conventional frame vehicles, stub frame and space frame vehicles, collision theory, collision forces and the definition of inertia and internal and external forces. The students will also determine the different types of alignment that result from the different types of collisions. Students will learn how to replace and align full and partial vehicle body parts; identify different types of pillars and rocker panels; read and

interpret dimension sheets and collision manuals; and identify different frame and frame types.

Prerequisite(s): CR101B

CR104B—VEHICLE ELECTRICAL AND MECHANICAL SYSTEMS

100 Contact Hrs (80 Lecture, 20 Lab/Shop); 4.5 Credits

This course is designed to cover basic electricity, electrical and electronic systems, active and passive restraint systems, lighting systems, steering, suspension systems, brakes, and air conditioning systems.

Students will learn how to properly use of automotive electrical testing equipment, identify the types and functions of an automotive wiring harness, including the functions of circuit control and protection devices. The students learn how to safely disconnect, remove, reconnect, and reinstall automotive computers without damage. Students will learn about the function of airbags and other active and passive restraint systems, including diagnostic procedures.

Students learn the principles and functions of automotive brake systems, including diagnostic procedures. Students learn how to remove, repair and replace brake assemblies.

Students apply principles and functions of automotive suspension systems, including diagnostic procedures, disassembly, repair and reassembly of suspension systems, and laser wheel alignment procedures.

Students apply the principles and components of automotive air conditioning systems. Students will learn how to properly evacuate, recharge, and service automotive air conditioning system.

Prerequisite(s): CR101B

CR109B—NON STRUCTURAL I

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course is designed to cover the skills and tools necessary for non-structural repair procedures. Students learn the types of steel used in vehicle construction and types of damage that can occur to steel.

Students will learn various collision repair tools and repair processes related to non-structural repair. Students will also learn various fillers used in non-structural repairs along sanding equipment and methods. The students will also learn about various tools and repair methods of PDR (Paintless Dent Removal).

Students will also learn about bolt-on components such as doors, front, and rear panels including installation and other considerations such as panel alignment and gaps. Weatherstripping and leak types as well as leak prevention are discussed.

Student will also learn tools and techniques for straightening steel.

Prerequisite(s): CR101B

CR107B—REFINISHING I

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course is designed to cover the proper use and techniques of automotive painting equipment. This includes spot jobs and complete paint jobs, vehicle preparation, equipment selection, painting techniques, and planning. During the course, students will learn how to perform proper stroke techniques, pressure settings and the proper temperature at which to paint. Students will learn how to properly prepare a vehicle for painting; identify the different types of paint; properly apply various paints; properly mix paint to achieve optimum color and viscosity; properly use paint mixing equipment to achieve proper color matching.

Prerequisite(s): CR101B

CR209B—NON-STRUCTURAL II

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course is designed to provide the student the opportunity to practice the skills of non-structural repair of the vehicle. The students will learn the proper repair, removal, replacement, and adjustment of manual and power window mechanisms. Students will also learn how to straighten metal body parts; repair plastic and composite parts; replace hoods, bumpers, fenders, grilles, and deck lids.

Prerequisite(s): CR101B, CR109B

CR210B—ALUMINUM WELDING AND METAL FABRICATION TECHNIQUES

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course is designed to provide the student the opportunity to learn how to weld aluminum, practice the skills of welding for both steel and aluminum, and apply fabrication. Students will learn the differences between welding steel and aluminum apply this knowledge to MIG welding aluminum. The student will demonstrate the required safety precautions that are a part of welding and cutting procedures in the collision industry. During this shop class the student will demonstrate the proper procedures for welding and fabricating components in a live shop. Students will also demonstrate the procedures that were taught in previous classes with regards to MIG and TIG welding and heating and cutting using a combination torch. Students will learn how to apply skills and techniques utilizing vehicles and mockups.

Prerequisite(s): CR101B, CR102B

CR211B—ADVANCED REFINISHING TECHNIQUES WITH CUSTOM PAINTING

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course will allow the student to practice proper worker protection techniques and the correct methods of handling hazardous material that collision shops generate. Students will learn theory and the student will use the spray equipment and spray booths that they have previously used in other classes. Students will practice the proper methods of mixing and matching colors in a shop situation as well as demonstrate the correct preparation and maintenance procedures for shop equipment for both waterborne and solvent based paints. Students will learn how to safely apply skills and techniques utilizing vehicles and mockups.

The students will learn how to apply airbrush techniques, with an emphasis on freehand skills. Students will learn how to properly select airbrush components; correctly use and maintain an airbrush; creatively layout and mask areas for airbrushing; use and apply decals; and properly blend automotive art with the vehicle's original finish.

This is a blended course, or a web-enhanced course that meets as a traditional on-campus course 80% of the time and 20% of course work occur online. Active participation in the online activities is required in order to pass this course.

Prerequisite(s): CR101B, CR107B

CR116B—MEASURING AND DAMAGE ASSESSMENT

100 Contact Hrs (35 Lecture, 65 Lab/Shop); 4.0 Credits

This course is designed to provide a detailed introduction to assessing, measuring and estimating the damage to conventional and unitized vehicles. The student will learn industry standard measuring devices and damage reporting processes. The students will learn how to use industry standard and conventional vehicle frames aligning equipment and devices.

Students will learn how to analyze structural damage to conventional and unitized vehicles; diagnose vehicle damage by using various manufacturers' electronic measuring devices and frame machines. Students will learn how to

Course Descriptions

Career Programs begin on page 8.

properly repair conventional vehicle frames by using frame equipment from various manufacturers' which includes, setting up the various measuring systems and checking and recording all of the measurements of the vehicle.

Prerequisite(s): CR101B, CR102B, CR103B, CR104B, CR107B, CR109B

CR216B – ADVANCED DAMAGE ANALYSIS AND ESTIMATING

100 Contact Hrs (50 Lecture, 50 Lab/Shop); 4.0 Credits

This course is designed to provide a more detailed overview to assessing, measuring and estimating the damage to conventional and unitized vehicles. The student will learn and practice with industry standard measuring devices and damage reporting processes as learned in previous classes. The students will learn how to use industry standard estimating software and how to complete vehicle repair estimates.

Students will learn how to analyze material damage, damage caused by hail, theft and vandalism, exterior panel damage and restraint system damage. The student will also learn how to plan and improve collision job process times along with quality inspection of repairs.

Prerequisite(s): CR101B, CR102B, CR103B, CR104B, CR109B, CR107B, CR116B

Automotive/Diesel & Truck/Heavy Equipment Courses

AUX100 – WORKSHOP PRACTICES AND GENERAL MAINTENANCE

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

The overall goal of this course is to facilitate a smooth transition to school by engaging the student in curriculum focusing on academic, career, and life skills. Students will make connections with key personnel within the school that will assist with their questions and provide guidance throughout their education.

The student will be introduced to automotive and diesel systems, industry certifications, and job opportunities. Students will learn essential skills for the vehicle technician including safety, tool and equipment fundamentals, and the proper use of measurement tools such as dial indicators, micrometers, and calipers.

The automotive and diesel content will be balanced by an emphasis on skills that will enable students to be successful in school and in life. These skills will include time management, financial management, goal setting, learning strategies, career planning, and critical thinking strategies.

Prerequisite(s): None

AUX113 – GASOLINE ENGINE CONSTRUCTION AND OPERATION

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with a detailed study of the modern internal combustion gasoline engine from the basic principles of design and operation to inspection, precision measurement, fitting, and reconditioning, including cooling systems, coolants, lubricating systems, and engine lubricants.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose various engine concerns through visual and auditory inspection. Students will learn how to disassemble, measure, troubleshoot, service, and reassemble a gasoline powered internal combustion engine. Professional

development exercises and seminars are also included in this course.

Prerequisite(s): None

AUX103 – ELECTRICAL SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with practical theory in basic and solid state circuitry, including body electrical systems, operation and service of automotive storage batteries, automobile charging systems, starting systems, and lighting systems. Students will evaluate components using both conventional and electronic diagnostic equipment.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose basic electrical, charging, starting, and lighting circuits through the use of diagnostic equipment to include test lights, multimeters, and continuity testers. Professional development exercises and seminars are also included in this course.

Prerequisite(s): None

AUX202 – POWERTRAIN ELECTRONICS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with knowledge of conventional and computerized engine control systems and scientific engine testing and tuning. Students will receive detailed instruction on operating principles, testing, replacement and repair of the ignition systems, by-products of combustion, including fuel supply and air induction systems, related emissions controls, and the principles of turbocharging. Emphasis is placed on troubleshooting, replacement, overhaul, and adjustment of fuel injection systems, including computer control models.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to use diagnostic scan tools to retrieve emission control trouble codes and determine necessary repairs. Students will learn how to diagnose no-start/no-fuel problems on hot and cold engines. Students will learn how to operate exhaust gas analysis equipment and determine necessary action. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100, AUX103, AUX109

AUX206 – TRANSMISSIONS AND DRIVE SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with a comprehensive coverage of drive train components, including theory, operating principles, service, and repair techniques of the clutch, differential and rear axles. Gearing, levers, hydraulics, component design, troubleshooting, replacement, disassembly, repair, service techniques, and assembly are emphasized. Manual and 4X4 transfer gear boxes, drive-shafts, U-joints, front and rear differentials, and manual transaxles are featured.

This course also provides the student with knowledge and skills needed to successfully diagnose and make needed repairs to automatic transmissions and transaxles. Emphasis is placed on power-flow, operation, design, servicing equipment, troubleshooting, disassembly, inspection, replacement, assembly, testing, and adjustment

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research

vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose, inspect, remove and replace a clutch. Students will learn how to diagnose, clean, inspect, disassemble, and reassemble a transmission/transaxle. Students will learn how to diagnose, inspect, remove, replace, and service front wheel-drive components and rear-wheel drive components. Students will learn how to perform necessary diagnostic tests using special equipment including scan tools to retrieve transmission/transaxle related trouble codes. Students will learn how to perform necessary service, repairs, and adjustments to automatic transmissions and transaxles. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100

AUX208 – AIR CONDITIONING AND ELECTRICAL ACCESSORIES

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with theory and application of automobile air conditioning and heating systems. Students will also be presented with the operation of various automobile accessories to include: power windows, door locks, and seats, and air bag operation and service.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose abnormal operation of air conditioning and heating systems, remove and replace air conditioning and heating system components, and evacuate and recharge automobile air conditioning systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100, AUX103

AUX109 – ADVANCED AUTOMOTIVE ELECTRONICS & DIAGNOSTICS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with a more in-depth knowledge of electrical and electronic principles, and advanced circuit applications. Students will learn about automobile computerized control systems as they apply to engine and body control as well as transmission, suspension, braking systems, and other computerized systems. Computer operation, sensors, and actuators are emphasized.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose automotive electrical and electronic circuits using a variety of diagnostic equipment to include digital volt-ohm meters, continuity testers, test lights, graphing multimeters, and oscilloscopes. Students will learn how to use diagnostic scan tools to retrieve trouble codes from vehicle computers and determine necessary repairs. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100, AUX103

AUX110 – AUTOMOTIVE BRAKE SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide comprehensive coverage of design, operating principles, maintenance and service of the automotive brake systems and traction control. Emphasis is placed on diagnosis and service of rotors and drums with measuring and resurfacing included. Anti-lock braking is covered from operating principles through diagnosis and service.

Course Descriptions

Career Programs begin on page 8.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose mechanical and hydraulic problems within the vehicle braking systems. Students will learn how to diagnose computer control problems within the anti-lock and traction control systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100

AUX211 – AUTOMOTIVE STEERING AND SUSPENSION SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with detailed instruction of the design and operating principles, maintenance and service of automobile suspension and steering systems including steering geometry and alignment angles. Emphasis is placed on wheel alignment procedures, including computerized four-wheel alignment. Service and diagnostics are stressed including McPherson struts, rack and pinion steering systems, and tire design and applications. New technologies are covered to incorporate electronic steering, and in-depth coverage of computerized suspension systems.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to diagnose, inspect, and service steering system components using industry standard equipment. Students will learn how to diagnose inspect, remove and replace rear-wheel and front-wheel drive suspension component. Students will learn how to perform alignments on front and rear wheel drive vehicles. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100

AUX124 – SERVICE SHOP MANAGEMENT

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the students with exposure to an actual shop environment, procedures, and protocol by applying prominent skills obtained in previous courses. This course will also provide the student with an orientation and introduction to the management and business component of the automotive industry. The management and procedures associated with automotive related businesses are emphasized including employee/employer expectations, the service write-up process, business organizational structure, career opportunities, customer relations, personnel management, facilities, business records, insurance, and safety. Knowledge relating to management practices within an automotive business will help the student adapt and acclimate to the working environment.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Students will learn how to prepare an employment resume and application. Students will learn how to complete various forms used in automotive businesses. Students will learn how to properly interview for employment. Professional development exercises and seminars are also included in this course.

Prerequisite(s): AUX100, AUX103, AUX208

AUX223 – SERVICE SHOP OPERATIONS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the students with exposure to an actual shop environment, operational

procedures, and protocol by applying prominent skills obtained in previous courses. Emphasis is placed on the performance and understanding of workshop tasks performed by entry-level technicians. Knowledge testing and skills application are highlighted among the topics.

Students will learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems.

Prerequisite(s): AUX100, AUX103, AUX109, AUX202, AUX208, AUX110, AUX211

MHT100 – SHOP PRACTICES & HYDRAULIC PRINCIPLES

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

The overall goal of this course is to facilitate a smooth transition to school by engaging the student in curriculum focusing on academics, career, and life skills. Students will make connections with key personnel within the school that will assist with their questions and provide guidance throughout their education.

The student will be introduced to medium and heavy duty truck systems, industry certifications, and job opportunities. Students will learn essential skills for the vehicle technician including safety and equipment fundamentals.

The student will also learn the basic operation of a hydraulic system. This includes giving a description of the operation and the diagnostic procedures for components in a hydraulic system. Students will study Pascal's Law and the Bernoulli's Principle of Hydraulics as they pertain to the repair industry. Lastly, the student will learn how to properly repair the basic hydraulic system in a hydraulic shop.

The course content will be balanced by an emphasis on skills that will enable the student to be successful in school and in life. These skills will include time management, financial management, goal setting, learning strategies, career planning, and critical thinking strategies.

Prerequisite(s): None

MHT101 – DIESEL ENGINES CONSTRUCTION AND OPERATION

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with the knowledge and skills necessary to service medium and heavy duty diesel engines. Instruction on the operating principles, construction, design variations, and applications of the diesel engines are emphasized.

The student will learn how to perform a complete disassembly and assembly of the diesel engine, to include the cylinder head, block and timing gears, by using the instructions in the engine's manufacturers service manual. They will also learn the proper methods of inspecting, identifying and naming the components to determine serviceability of the components prior to making a repair. This will include learning how to make all the necessary precision measurements required for diagnosing component failure prior to servicing and repair of the engine.

The student will learn how to service, repair and diagnose the cooling and lubricating system of diesel engines. The student will learn the different types of coolants as well as additives and how to test for Supplemental Coolant Additives (SCA) to determine if additions to or replacement is needed. Students will learn how to perform coolant tests with different testing equipment.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): None

MHT102 – DIESEL FUEL SYSTEMS AND TUNE UP

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with the knowledge and skills necessary to service fuel systems found on diesel powered truck tractors. The student will learn how to perform maintenance, service and repair on diesel fuel systems such as the Common Rail System, Detroit Diesel Electronic Controls (DDEC), different Cummins Systems, and International HEUI systems. The student will learn how to perform tune-ups on diesel engines by following manufacturer's service procedures and specifications.

The student will learn how to identify the different exhaust compounds from a diesel engine and define the ones that are classified as pollutants. The student will learn about the various manufacturers' exhaust aftertreatment systems. The student will learn how to perform an opacity smoke test and correlate the test results to engine performance and possible component failure.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100, AUX103, MHT108

MHT103 – HEAVY DUTY DRIVE TRAINS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with the knowledge and skills necessary to service the drive trains found on diesel powered truck tractors. The student will learn how to identify the components of a heavy duty clutch system. Students will learn how to diagnose a clutch system for wear and damage and give the possible causes of specific clutch defects. The student will learn how to remove and replace a heavy duty truck clutch system.

The student will learn how to identify and describe the various gear designs and shift mechanisms used in heavy duty trucks. The student will also learn how to calculate both the gear pitch and gear ratios in a heavy duty drive line. The student will learn how to disassemble and reassemble a heavy duty transmission, differential and power divider as well as learning how to service the heavy duty drive line components in maintaining the correct lubricant and the level of lubricant in the system. The student will also learn how to perform basic diagnostic procedures on an automated standard transmission.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100

MHT106 – TRUCK STEERING AND SUSPENSION SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with the knowledge and skills necessary to service heavy duty truck steering and suspension systems. The student will learn how to identify, diagnosis, service, repair, and adjust as necessary; the components of a heavy duty truck steering system to include toe-in, camber, caster, axle inclination, turning radius and axle alignment and how they affect tire wear, directional stability and handling. The student will learn how to balance truck tires and wheels and perform a wheel alignment to include the rear axle(s) by using computerized wheel alignment equipment

The student will learn how to service the major tire and wheel configurations used on heavy duty trucks. Students will learn how to perform bearing and seal service on both grease lubricated and oil lubricated front and rear hubs. The student will learn how to perform the basic checks for frame alignment and geometry and how the frame and chassis components are repaired. The student will learn how to service,

Course Descriptions

Career Programs begin on page 8.

repair and replace if necessary, the components on the four types of suspension systems.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100

MHT107 – AIR AND HYDRAULIC BRAKE SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course has been designed to provide comprehensive information on air and hydraulic brake systems as they apply to medium heavy duty transport vehicles. The student will learn to identify, locate, and diagnose the components of the truck brake systems, as it applies to hydraulic, air over hydraulic, or air brake systems. The student will learn to perform maintenance, service, and repair of brake system components on medium and heavy duty truck.

The student will learn to identify, locate, diagnose, service, and repair as necessary, components of ABS, EBS systems on a heavy duty truck and trailer. The student will learn to use LED lights and blink codes to assist them in diagnosing problems with the ABS, EBS systems. The student will learn how to perform maintenance, service, repair, and overhaul of disc and drum brakes as it applies to hydraulic, air over hydraulic, and air brake systems found on medium and heavy duty trucks.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100

MHT108 – TRUCK ELECTRICAL AND ELECTRONICS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with the necessary skills and knowledge required to identify, service, and repair the different types of electrical and electronic circuits found on late model medium and heavy duty trucks. Operation, diagnosis, and service of the trucks computer systems will be emphasized.

The student will learn to apply Ohm's law to series, parallel and series-parallel circuits and how data is transmitted from the various engine, body, and electronic system sensors to onboard computers that control fuel management, driveability performance, and driver comfort systems.

The student will learn how to diagnose and service electrical and electronic systems using wiring diagrams, manufacturer service manuals, and specialized diagnostic equipment. The student will learn how to properly identify, disassemble, repair as necessary, and assemble connectors and wiring on medium and heavy duty trucks.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100, AUX103

MHT223 – PREVENTATIVE MAINTENANCE & WELDING

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with the knowledge and skills necessary to perform service, maintenance, and PM Inspection on medium and heavy-duty trucks and trailers. The student will learn the proper procedures that must be taken to perform a PM Inspection including the completion of PM Inspection forms. The student will learn how a well-planned preventive maintenance program can reduce repair cost and increase the life of the truck, trailer, and other associated equipment.

The student will learn how to properly inspect, lubricate, and repair or replace as necessary; components of the truck drive line as well as checking for proper driveline angles and balance. The student will learn how to

perform the proper service, maintenance, repairs and inspection procedures on the trailers lighting system, wheels, tires, brakes and other safety related components as required by law. The student will learn how to disassemble, inspect, service, and reassemble, the fifth wheel. Students will learn how to properly perform the necessary service and maintenance procedures related to pintle hooks and drawbars.

The student will learn how to take the necessary safety precautions as they pertain to cutting, welding and hydraulics. They will learn how to weld with a MIG welder. The student will also learn how to use an oxyacetylene combination torch to cut metal.

Students will also learn how to complete repair orders containing customer and vehicle information and corrective action. Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100, AUX103, MHT106,

MHT107

MOP201 – MOPAR INTRODUCTION TO ELECTRICAL FUNDAMENTALS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

Introduction to Mopar products and systems; Students will become familiar with the Mopar vehicle series and consumer features. Students will be able to operate and explain these features to the customer. Students will be able to conduct a Pre Delivery Inspection, identify concerns and make corrections prior to vehicle delivery. Students will understand and perform standard vehicle maintenance which includes general vehicle maintenance, proper tire mounting and balancing. Students will become familiar with Mopar Service procedures along with technician and customer safety. Students will be introduced to Mopar diagnostic tools and reference sources and be able to operate and access the same. Students will be able to understand and perform repairs to the vehicle electrical systems. Students will be able to understand and perform repairs to the battery, starting, and charging systems, parasitic draw and battery management. Students must register for and complete online course requirements using the Mopar On-line Knowledge and Certification Resource Centers.

Prerequisite(s): AUX100, AUX103, AUX109, AUX202, AUX208, AUX110, AUX211

MOP202 – MOPAR ENGINES AND PERFORMANCE SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with a more in-depth knowledge of engine construction and the control systems. Introduction to Mopar advanced diagnostic systems, troubleshooting, and network communication systems. Students will continue to use Mopar diagnostic tools and develop their skills in order to properly diagnose vehicle concerns and issues. Students will use Mopar specific scan tools for in-depth diagnostics and addressing customer vehicle concerns, along with identifying communication protocol. Students will understand vehicle coding, diagnostics, locating system faults, and making system repairs. Students must register for and complete online course requirements using the Mopar On-line Knowledge and Certification Resource Centers.

Prerequisite(s): MOP201

MOP203 – MOPAR TRANSMISSION AND DRIVELINE SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with a more in-depth knowledge of transmission construction and the control systems. Introduction to Mopar advanced powertrain diagnostic systems, troubleshooting, and network communication systems. Students will continue to use Mopar diagnostic tools and develop their skills in order to properly

diagnose vehicle concerns and issues. Students will use Mopar specific scan tools for in-depth diagnostics and addressing customer vehicle concerns, along with identifying communication protocol. Students will understand vehicle coding, diagnostics, locating system faults, and making system repairs. Student will learn four wheel drive and all-wheel drive system design and construction. Students will learn axle and chassis theory, applications, repair and diagnostics. Students must register for and complete online course requirements using the Mopar On-line Knowledge and Certification Resource Centers.

Prerequisite(s): MOP201

MOP204 – MOPAR ADVANCED POWER MANAGEMENT, OCCUPANT SAFETY AND NETWORK DIAGNOSTICS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to provide the student with a more in-depth knowledge of occupant safety and restraint systems. Introduction to Mopar advanced network diagnostic systems, troubleshooting, and network communication systems. Students will learn media and climate controls systems. Students will learn fuel and emission system operation. Students will continue to use Mopar diagnostic tools and develop their skills in order to properly diagnose vehicle concerns and issues. Students will use Mopar specific scan tools for in-depth diagnostics and addressing customer vehicle concerns, along with identifying communication protocol. Students will understand vehicle coding, diagnostics, locating system faults, and making system repairs. Students must register for and complete online course requirements using the Mopar On-line Knowledge and Certification Resource Centers.

Prerequisite(s): MOP201

HET112 – HYDRAULICS FOR HEAVY EQUIPMENT APPLICATION

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course covers the basic operation of a hydraulic system to include the description, operation, safety precautions, and a logical approach to component and system diagnosis. The student will study Pascal's Law and Bernoulli's Principles of hydraulics as they relate to the repair industry. The student will have the opportunity to demonstrate skills learned through hands-on application on live equipment.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100, AUX103

HET113 – WELDING & SAFE EQUIPMENT OPERATION

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is an introduction to welding, safe operation of construction equipment, and equipment preventive maintenance. The student will learn the necessary safety precautions pertaining to cutting, welding, and general equipment operation. The student will have the opportunity to demonstrate welding skills with MIG and ARC welders. Students will learn the proper methods of cutting utilizing oxyacetylene combination torches.

Emphasis will be placed on maintenance tasks that technicians in the heavy equipment industry are required to perform. Students will demonstrate newly acquired skills while utilizing live equipment. Students will learn various OSHA requirements for proper personal and equipment operator safety.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100

Course Descriptions

Career Programs begin on page 8.

HET116 – HEAVY EQUIPMENT POWERTRAINS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course provides the student with the fundamentals of heavy equipment power train systems. Emphasis is on real world hands-on shop experience utilizing live heavy-duty equipment. Students will disassemble equipment including front-end loader differentials, planetary gear sets, and multiple countershaft Powershift transmission, mechanical transmissions, and clutch assemblies. Students will be required to remove, inspect, and replace mechanical transmissions and clutch assemblies.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100

HET117 – HEAVY EQUIPMENT SYSTEMS

120 Contact Hrs (60 Lecture, 60 Lab); 5.0 Credits

This course is designed to teach students the fundamentals of heavy equipment systems. Emphasis is on real world hands-on shop experience utilizing live heavy-duty equipment. Students will disassemble different types of equipment including; front-end loader differential, backhoe suspension, brake systems, kingpin suspension systems, and foundation brakes. Students will also remove and install rubber and steel track systems.

Students will learn how to research vehicle service information with computer and internet based electronic retrieval systems. Professional development exercises and seminars are also included in this course.

Prerequisite(s): MHT100

Welding Courses

WEL110 – WELDING AND CUTTING FUNDAMENTALS

120 Contact Hours (60 Lecture/60 Lab); 5.0 Credits

In this course students are introduced to the type of tasks generally performed by welders and how their skills and knowledge are applied to both the construction and manufacturing industries. Because of its importance students will also learn how safety procedures apply to welding and cutting operations. They will also complete a ten-hour OSHA approved safety orientation that explains job site hazards, accident prevention, and standard safety procedures.

Students will learn to set-up and safely use oxyfuel metal cutting equipment and processes. They will then learn to read and interpret welding symbols from construction drawings. These symbols direct the student to use the correct welding procedure to meet the specifications.

Students will learn the classifications and types of welding electrodes used in arc welding. In addition, they will learn the criteria used to select the proper electrode for a specific application. Students will also properly set up SMAW arc welding equipment prior to beginning welding operations. They will learn about the different types of welding equipment and the types of current used in their operation. As a part of learning about the total scope of welding operations, students will be introduced to various welding codes and the agencies that govern these codes. They will see examples of weld imperfections and learn what causes these defects. Students will also be introduced to various weld testing procedures.

Prerequisite(s): None

WEL120 – BASIC ARC WELDING PROCEDURES

120 Contact Hours (60 Lecture/60 Lab); 5.0 Credits

This course is a continuation of WEL110 Welding and Cutting Fundamentals and introduces new

technical information as well as continues to develop fundamental arc welding skills.

As a continuation about the characteristics of metal, students will learn to properly prepare metal for cutting and welding operations. This includes cleaning and grinding operations. They will also learn some of the basic joints used in welding metals together. Students will then use plasma arc cutting equipment to cut metal at a faster rate with a cleaner cut.

As metal is heated and cooled, its characteristics and strength can change considerably. Students learn how metal is formed when it transfers from a liquid to a solid form, what are identifying metal designations and structural shapes and the strength characteristics of various types of metal, and the effect heat has on the strength properties of metal.

Students will be given an opportunity to continue to develop their skills in operating electric arc welding equipment and developing SMAW arc welding control and application techniques. Students are expected to successfully weld weave and overlapping beads, horizontal fillet welds (2F position), vertical fillet welds (3F position), and overhead fillet welds (4F position). In the process they will use fit up gauges and measuring devices to be sure the metal is properly aligned before beginning welding operations.

Prerequisite(s): WEL110

WEL130 – SMAW - PLATE WELDING

120 Contact Hours (60 Lecture/60 Lab); 5.0 Credits

In this course, students first learn a new technique for cutting, gouging, and “washing” steel using air carbon arc cutting and gouging equipment.

Students then use the welding techniques they developed in the first two courses and apply them to welding plate metal with open grooves. Students will learn to form grooves in plate metal and setup welding plate using a metal backing.

Students will learn to weld steel plate in a flat V-Groove (1G position), and vertical V-Groove (3G position). Students will also learn to weld V-Groove steel plate in the 1G, and 3G position.

Prerequisite(s): WEL110, WEL120

WEL140 – GMAW/FCAW (MIG) – PLATE WELDING

120 Contact Hours (60 Lecture/60 Lab); 5.0 Credits

This course introduces students to Gas Metal Arc Welding and Flux Core Arc Welding processes used for welding carbon steel plate. Students will learn the similarities and differences for these two processes. They will learn to setup the welding machine, gas flow meter, and welding gun. Students will then practice welding plate in the Fillet Weld positions (1F, 2F, 3F, and 4F) and Open Root V-Groove positions (1G, 2G, 3G, and 4G) using both processes.

Prerequisite(s): WEL110, WEL120, WEL130

WEL150 – GTAW (TIG) –WELDING PROCEDURES

120 Contact Hours (60 Lecture/60 Lab); 5.0 Credits

This course introduces students to Gas Tungsten Arc Welding (GTAW) processes. Students will learn the different components of GTAW equipment, the different types of filler metals used, and the types of shielding gases used in the welding process. They will learn to weld sheet steel, aluminum, and stainless steel in several basic joint designs to include butt weld, T-joint weld, and a lap weld.

Prerequisite(s): WEL110, WEL120, WEL130

WEL180 – GMAW/GTAW – FABRICATION PROCESSES

120 Contact Hours (60 Lecture/60 Lab); 5.0 Credits

This course applies both GMAW and GTAW welding procedures to various fabrication processes. Students set up equipment to weld various types of sheet metal. Using an assigned project, students will read and

interpret drawings, learn to layout, cut and/or correctly apply bend reductions to specifications, and weld joints using weld designs and procedures learned in WEL140 and WEL150. Sheet metal application may be steel, stainless steel, and/or aluminum.

Prerequisite(s): WEL110, WEL120, WEL130, WEL140, WEL150

General Education Courses

GEN130V – INTRODUCTION TO CRITICAL THINKING

45 Contact Hrs (45 Lecture, 0 Lab); 3.0 Credits

This course presents students with techniques to develop their critical thinking skills. Topics include the importance of language, ambiguity, structure of arguments and creative problem solving. Upon successful completion of this course students should be able to demonstrate an improvement in their ability to apply critical thinking skills to real world situations.

Prerequisite(s): None

GEN180V – COLLEGE ALGEBRA

45 Contact Hrs (45 Lecture, 0 Lab); 3.0 Credits

This course focuses on algebraic concepts essential for success in the workplace and other courses. Using real world examples and applications, students practice fundamental operations with number systems, formulas, algebraic expressions and linear equations. This course also explores problems involving factoring, inequalities, exponents, radicals, linear equations, functions, quadratic equations and graphs. Skills for success in mathematics will be emphasized.

Prerequisite(s): None

GEN190V – ENGLISH COMPOSITION I

45 Contact Hrs (45 Lecture, 0 Lab); 3.0 Credits

Students develop written communication skills, with emphasis placed on the principles of effective communication which includes understanding the writing process, analysis of readings, as can be applied personally and professionally.

Prerequisite(s): None

GEN150V – ENVIRONMENTAL SCIENCE

45 Contact Hrs (45 Lecture, 0 Lab); 3.0 Credits

This course is designed to provide students with a basic scientific overview of how nature works and how things in nature are interconnected. This course explores the study of the earth's natural resources. Topics include the study of how air, water, soil, natural energy, and the minerals are critical and related parts of the earth's interconnect systems.

Prerequisite(s): None

GEN292V – SPEECH COMMUNICATION

45 Contact Hrs (45 Lecture, 0 Lab); 3.0 Credits

This course will enhance the student's understanding and appreciation of the uses of oral communication and will teach the skills needed to speak effectively in a variety of situations.

Prerequisite(s): None

General Information

■ Accreditation

Lincoln College of Technology is institutionally accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC), 2101 Wilson Boulevard, Suite 302, Arlington, Virginia 22201, (703) 247-4212, www.accsc.org. ACCSC is listed by the U.S. Department of Education as an institutionally recognized accrediting agency.

PROGRAM ACCREDITATION

Automotive

- ASE Education Foundation

Heavy Equipment

- Associated Equipment Distributors (AED Foundation)

■ Approvals

We are approved by the Tennessee Higher Education Commission for the training of veterans, eligible persons, and non-veterans. We are authorized under federal law to enroll foreign students.

Lincoln College of Technology is authorized by the State of Tennessee Higher Education Commission. This authorization must be renewed annually and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

Licensed and approved by the State Department of Education under Title 16-46-1 through 10, Code of Alabama, Act No. 8-872, Regular Session 1980.

This institution is authorized by the Indiana Board for Proprietary Education, 101 West Ohio Street, Suite 300, Indianapolis, Indiana 46204-4206, telephone (317) 464-4400.

Licensed by the Kentucky Commission on Proprietary Education, 500 Mero Street Frankfort, 4th Floor, Frankfort, KY. 40601, telephone (502) 564-4185.

Licensed by the Louisiana State Board of Regents and adheres to the rules and regulations of the Louisiana Proprietary Schools Advisory Commission.

Licensed by the Mississippi Commission on Proprietary School and College Registration, Certificate No. C222. Licensure indicates only that minimum standards have been met; it is not an endorsement or guarantee of quality. Licensure is not equivalent to or synonymous with accreditation by an accrediting agency recognized by the U.S. Department of Education.

Lincoln College of Technology has a certificate to operate in the State of Missouri, Coordinating Board for Higher Education.

Authorized under provisions of Nebraska Revised Statutes, Sections 85-1601 through 85-1658.

Approved by the State Board of Career Colleges and Schools, Ohio 03-058-1671T. If a problem arises, the student should first contact the Academic Dean.

Student grievances not resolved by the school may be brought to the attention of John Ware, Executive Director, Ohio State Board of Career Colleges and Schools, 30 East Broad Street, Suite 2481, Columbus, Ohio 43215, telephone (614) 466-2752.

Licensed by the Oklahoma Board of Private Vocational Schools.

Licensed by the South Carolina Commission on Higher Education, 1122 Lady Street, Suite 300, Columbia, South Carolina 29201, telephone (803) 737-2260. Licensure indicates only that minimum standards have been met; it is not an endorsement or guarantee of quality. Licensure is not equivalent to or synonymous with accreditation by an accrediting agency recognized by the U.S. Department of Education.

Authorized under the provisions of Title 133, Series 35 of the code of West Virginia.

■ Associations & Memberships

- Career Education Colleges and Universities (CECU)
- Better Business Bureau
- American Welding Society (AMS)
- National Association of Student Financial Aid Administrators (NASFAA)
- Tennessee Association of Student Financial Aid Administrators (TASFAA)
- Career Colleges of America (CCA)
- Automotive Training Managers Council (ATMC)
- North American Council of Automotive Teachers (NACAT)

■ Statement of Ownership

Lincoln College of Technology is owned and operated by Nashville Acquisition, LLC, a wholly owned subsidiary of Lincoln Educational Services Corporation. The major officers and administrators of the corporation are:

Scott M. Shaw, *President & CEO*

Brian K. Meyers, *Executive Vice President & CFO*

Alexandra M. Luster, *Corporate Secretary*

■ Notice to Students

1. The School is relieved and released of all claims by the student that may arise as a result of the school's inability to perform hereunder as a result of an Act of God, strike, or any other matter or thing beyond the control of the school.
2. Applicants interested in training in our Career Fields should be aware of the job duties they may need to be capable of performing prior to enrollment. These can be found on the O*NET Online website at www.onetonline.org. O*NET Online is sponsored by the U.S. Department of Labor, Employment & Training Administration, and developed by the National Center for O*NET Development.
3. Criminal records and/or certain background issues may present a barrier to employment in certain fields. Applicants may be denied admission as a student if after screening it is determined that employment after graduation is not possible due to background issues.
4. Students must meet the Tennessee Department of Health Immunization requirements as outlined in the *Tennessee Department of Health Rule 1200-14-1-29*, revised December 2009.

■ Compliance with City, State, and Federal Regulations

Lincoln College of Technology complies with all local, municipal, city, county, state, and federal regulations.

■ NonDiscrimination and Harassment Policy

Lincoln College of Technology is committed to maintaining an educational and work environment free from discrimination and harassment based on age, race, color, sex, gender, sexual orientation, religion or creed, national or ethnic origin, or disability. Lincoln Tech, in accordance with applicable federal laws including Title IX of the Education Amendments of 1972 and 34 C.F.R. Part 106, does not discriminate on the basis of any of the listed protected categories, including in admissions

General Information

and employment, nor will it permit or tolerate discrimination or harassment against a student, employee, or other member of the Lincoln community.

All students and employees are expected to comply with Lincoln's Nondiscrimination Policy and Title IX Policy. Any inquiries regarding these policies and procedures can be directed to the Title IX/Equity Coordinator as provided below, the Office for Civil Rights, at the U.S. Department of Education, at <https://www.ed.gov>, or both.

This Policy does not specifically address any applicable state laws on sexual harassment. Lincoln retains the right to revise its policies and procedures in light of any changes to applicable law.

To view the entire Nondiscrimination policy, please visit:

NonDiscrimination Policy.

To view the entire Title IX policy, please visit:

Title-IX-Policy-FINAL.

■ Campus Crime Statistics

Lincoln College of Technology complies with the Clery Act regulations. Prospective and enrolled students may obtain a paper copy of this report by contacting the Education Office, Security Office, or Human Resources office or you may access the report at the following web site:

www.lincolntech.edu/consumerinfo.

■ Facilities and Training Aids

Lincoln College of Technology is located on 16.95 acres of land with over 280,000 square feet of facilities space to include classrooms, shops, labs, computer labs, a library, offices, dining halls and residential halls. Student parking facilities are located near the campus within easy walking distance to each building.

Students will find the tools, equipment and vehicles needed to prepare them for entry level jobs in the transportation repair industry. Recognizing that many students are visual learners we balance the training program between necessary lectures and actual hands on applications for the work. Students can learn a great deal from the use of available training aids and equipment for the automotive, truck, heavy equipment, and collision repair and refinishing industries.

In the Automotive portion of the program students will spend time working with electrical training aids, over 50 live gas engines, automatic transmissions from many different manufacturers, a transmission dyno that allows for live testing of automotive transmissions, fuel and emission test stands, air conditioning systems, brake systems, alignment equipment and vehicle systems and many different school owned automobiles. Any special tool that is needed to work on any type of automotive system is provided by the school.

In the diesel and truck portion of the programs students gain exposure to over 50 live CAT, Cummins, and Detroit Diesel engines, standard and automatic heavy duty transmissions, truck/air brake systems, truck chassis systems, a wide variety of diesel fuel systems, and heavy duty steering and suspension systems.

Additionally students have the opportunity to work on many different Class 8 trucks in the different modules of training. Students in the truck program have the opportunity to work on Freightliner, Kenworth, Volvo and Sterling Class 8 tractors among others. All of the specialty tools needed to work on these truck systems are provided by the school.

Heavy Equipment training includes exposure to a variety of hydraulic systems used on modern vehicles, equipment steering and suspension systems, as well as specialized braking systems used on equipment. Students have the opportunity to work on material handling equipment, back hoes, bulldozers and other pieces of heavy equipment. Again the tools needed for this specialized area of training are provided by the school.

Collision Repair and Refinishing students will learn how to do many tasks required to return a crashed vehicle to its original form and shape. Lincoln College of Technology uses the I-Car curriculum for the entire program of training. Whether it is frame straightening equipment, mechanical systems, or conventional paint or water-born paint systems, LCT students will have a basic insight into how that system or equipment works in a real world setting.

The LCT Program Advisory Committee is made up of senior people from some of the country's major companies. This group helps us to stay apprised of industry trends and recommends ways in which we can improve and modernize our programs. Through our partnership with these companies LCT students gain the advantage of their experience and guidance as they prepare for the transition into the workforce.

■ Learning Resource Center

The Resource Center is a service designed to assist students during their time at Lincoln College of Technology. The Resource Center includes a web tech laboratory, in print and online resources, and hosts tutoring opportunities. Tutoring is available upon request to assist students with a variety of academic needs including reading comprehension, writing, mathematics, skilled trades, school to work skills, and various other individual tutoring needs.

The Learning Resource Center has several charging stations for laptops and desktop computers equipped with industry-standard window applications. Each computer has access to the internet in addition to several valuable software applications. Our learning resource center incorporates a comprehensive variety of books and periodicals covering subjects such as automotive/diesel technology, welding and collision, ASE test preparation, communications, economics, accounting, computers, business management and marketing, language arts, and mathematics. The web tech lab has several computers to assist students and faculty. These computers are equipped with Microsoft Edge, Windows 10, and databases including Mitchell on Demand, I-Car, All-Data, Freightliner, Miller, Kenworth, Eaton Transmissions, and more.

Admissions Policies

Admission Requirements	27
Orientation Program	27
Introductory Period of Enrollment	27

Admissions Policies

■ Admission Requirements

In order to be considered for acceptance, an applicant must meet the following requirements:

- Be a high school graduate or possess a state-approved high school equivalency assessment including, but not limited to: a GED, HiSET or TASC examination; or possess an associate's degree or higher from an accredited institution.
- Complete and sign an Enrollment Agreement.
- Complete the Learner Assessment to determine readiness for academic success.
- Have reliable internet connectivity and access to a device that meets the minimum systems requirements. See your Admissions contact for current systems requirements.

■ Orientation Program

An orientation program is scheduled for each incoming class. The purpose of this program is to acquaint the student with necessary requirements if applying for financial aid and/or housing, to the rules and regulations of the college, and to issue appropriate class assignment. Students will be notified, in writing, of the orientation date. Failure to attend the orientation program may result in rescheduling of starting date. Students are expected to fulfill their initial financial obligations at this time.

■ Introductory Period of Enrollment

Lincoln College of Technology is offering new students at this campus an opportunity to enroll under an introductory period of enrollment. During this introductory enrollment period, which is applicable to all programs, students will be able to attend the school for 10 calendar days, including weekends and holidays, without any tuition obligation to Lincoln College of Technology. If a student attends any scheduled class after the 10th calendar day, the introductory period will be concluded. Those students who do not attend after the 10th calendar day will be considered cancelled and will not have any tuition obligation to Lincoln College of Technology.

Students who choose not to continue their enrollment at Lincoln College of Technology during the introductory period, will be charged for all books, uniforms, tools, and equipment not returned in new condition to the school. Further, the school application or registration fee is non-refundable if a student decides to withdraw from Lincoln College of Technology during the introductory period of enrollment.

Lincoln College of Technology reserves the right to withdraw a student prior to the conclusion of the introductory period of enrollment due to violations of the institution's attendance policy or student code of conduct.

Financial Aid Information

Most students who attend LCT benefit from some type of ***financial aid***.

Financial aid is available to those who qualify.

Financial Aid Information

Financial Aid Programs

A call or visit to Lincoln College of Technology's Financial Aid Office will help determine eligibility for the various sources of financial assistance. LCT is an eligible institution under the following student financial aid programs:

- *Federal Direct PLUS Loan for Undergraduate Students*
 - * *The William D. Ford Direct Loan Program*
 - ** *Federal Pell Grant Program*
 - ** *Federal Supplemental Education Opportunity Grant Program (FSEOG)*
 - *** *Federal Work-Study (FWS) Program*
- * LOANS are borrowed money that you must repay with interest.
** GRANTS are awards that you may not have to pay back.
*** WORK-STUDY gives you the chance to work and earn money to help pay for school

Undergraduates may receive aid from both types of programs.

Eligibility for the Indiana Grant is applicable ONLY to Indiana students enrolled in one of the Associate in Applied Science Degree Program. Students must apply between January 1 and March 1 of each year. See the Financial Aid Office for additional eligibility criteria.

LINCOLN BRIDGING THE GAP GRANT

The Lincoln Bridging the Gap Grant is available to eligible, full time students who have remaining financial need for direct costs after exhausting all available student aid.

Eligibility for this program is determined based on the following criteria:

- Confirmed enrollment in an approved program of study
- Completed FAFSA for the applicable award year with an official Estimated Family Contribution (EFC)
- Acceptance of all available student aid from federal, state and other sources.
- Remaining financial need for direct costs (tuition and fees) greater than \$500 after all other sources of student aid have been exhausted.

The Lincoln Bridging the Gap Grant awards will vary depending on each applicants' determined institutional need. This grant does not carry any cash value.

The grant is awarded in up to two disbursements per academic year. Due to limited funding, not all students who are eligible will receive this award and the grant program may not be available each academic year.

VA PENDING PAYMENT COMPLIANCE

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent the students enrollment;
- Assess a late penalty fee to;
- Require student secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Provide Chapter 33 Certificate of Eligibility (or its equivalent) or for Chapter 31, VA VR&E benefits must be approved by VR&E counselor and the authorization must be uploaded to Tungsten by the first day of class.

Note: Chapter 33 students can register at the VA Regional Office to use E-Benefits to get the equivalent of a Chapter 33 Certificate of Eligibility. School Certifying Official will receive a system-generated email indicating an Authorization is available in the Tungsten Network.

- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

G.I. Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

LINCOLN PRIDE GRANT

Purpose:

Lincoln Pride Grant is designed to provide financial assistance to students who meet the criteria established below and want to enroll in one of the Lincoln Group of Schools. The Lincoln Pride Grant is capped at \$1,000. By offering the Lincoln Pride Grant to future students who are interested in vocational career training, Lincoln continues to show its commitment to helping students reach their goals as it has done since opening its first school in 1946.

Eligibility Requirements:

In order to receive the Lincoln Pride Grant, an eligible student must:

1. Complete the application process to enroll;
2. Complete the Free Application for Federal Student Aid (FAFSA);
3. Must reside outside a 50 mile radius of the campus;
4. Must seek results of PLUS loan credit authorization.

This grant does not carry any cash value.

FRIENDS AND FAMILY EDUCATION GRANT

The Friends and Family Education Grant is designed to provide financial assistance to students who are connected to our graduates or employers/partners.

In order to apply for this grant, an eligible student must:

- Applicants must submit contact information of their connection to a Lincoln Tech employer/partner/graduate;
- Complete the application process to enroll;
- Complete the Free Application for Federal Student Aid (FAFSA);
- Submit your Lincoln Grant request form to the financial aid staff or email: scholarships@lincolntech.edu;
- Must start training program by December 31, 2023

Those students awarded a grant must maintain satisfactory academic progress and also must attend the Lincoln Financial Literacy presentation within six weeks of enrollment.

Each eligible student may apply for one grant with an award of \$1,000. The grant will be prorated over the entire length of his/her program. Applications can be submitted any time prior to enrollment periods established by the school of your choice. The grant will not be awarded to any student who defers their enrollment past the requisite time period.

Financial Aid Information

Scholarships

Lincoln College of Technology provides a number of scholarships annually. Please refer to the Catalog Addendum for the latest offerings.

Tuition and Fees

The *Schedule of Fees* addendum contains detailed information about the school's tuition and other charges.

Tuition is payable in advance. A definitive tuition schedule will be established prior to the start of class. Absence from class does not relieve the student of tuition liability.

A registration fee will be charged to LCT diploma graduates who have been out of school for more than one year, as well as students transferring from other accredited postsecondary institutions.

With the exception of students who cancel prior to starting classes, the school does not refund any monies for registration fees, books, tools or uniforms for any reason. Any refund due for student fees or technology fees will be prorated based on use.

Student obligations relating to payment for purchases made from the school must be met in accordance with the provisions and the purchase agreements made at the time of the sale.

For more details, see *Schedule of Fees* addendum.

Tennessee Cancellation/Refund Policy

CANCELLATION/WITHDRAWAL BY STUDENT

1. You may cancel this agreement with-out penalty or obligation by notifying Lincoln College of Technology, 1524 Gallatin Avenue, Nashville, TN 37206, or (800) 228-6232 by midnight of the 6th business day from the date of the enrollment agreement.
2. Students electing to withdraw from their selected program must visit the Education Office to complete a Withdrawal Form stating his/her intent to withdraw, complete an exit interview with an Education Supervisor and the Financial Aid Office.
3. The student understands that should he/she not start on the scheduled starting date or withdraws prior to completion, he/she may be required to sign a new contract at current tuition rates at the time training resumes.

TUITION REFUND POLICY

- A. When notice of cancellation is given within six (6) business days after the date of enrollment, all registration fees, tuition, and any other charges will be refunded to the student. Any money due the student shall be refunded within thirty (30) days from the date the enrollment agreement is received in the school's office.
 - B. When notice of cancellation is given after the sixth (6th) business day following enrollment, but is given prior to the student's first day of class attendance, the school will retain no more than the registration fee.
 - C. Students who have not visited the school facility prior to enrollment will have the opportunity to withdraw without penalty within three (3) days following either attendance at a regularly scheduled orientation program or following a tour of the school facilities and inspection of equipment.
- D1. If after classes have commenced and before expiration of ten percent (10%) of the period of enrollment for which the student was charged, a student withdraws, drops out, is expelled, or otherwise fails to attend classes, the refund shall equal seventy-five percent (75%) of all refundable fees paid

and, if the student has institutional loans, forgiveness of the loan amount in excess of the twenty-five percent (25%) the student owes the institution, less registration fee of one hundred dollars (\$100.00);

- D2. If after expiration of ten percent (10%) of the period of enrollment for which the student was charged, and before expiration of twenty-five percent (25%) of the period, a student withdraws, drops out, is expelled, or otherwise fails to attend classes, the refund shall equal twenty-five percent (25%) of all refundable fees paid and, if the student has institutional loans, forgiveness of the loan amount in excess of the seventy-five percent (75%) the student owes the institution, less registration fee of one hundred dollars (\$100.00); or
- D3. If after expiration of twenty-five percent (25%) of the period of enrollment for which the student was charged, a student withdraws, drops out, is expelled, or otherwise fails to attend classes, the student may be deemed obligated for one hundred percent (100%) of the tuition and other fees charged by the institution.
- D4. For a student who cannot complete one or more classes because the institution discontinued such a class during a period of enrollment for which the student was charged, the institution shall refund the sum of all refundable fees paid and, if the student has institutional loans, forgive the amounts owed by the student.

REGISTRATION FEE, STUDENT FEE, TECHNOLOGY FEE, BOOKS, TOOLS & UNIFORMS REFUND POLICY

Students who cancel enrollment or withdraw after receiving books and supplies may return these items if they are in good condition within five (5) days following a cancellation notice or twenty (20) days following date of withdrawal. Any refund due for student fees or technology fees will be prorated based on use.

Return of Title IV Federal Student Aid*

Federal regulations regarding repayment of Federal Financial Aid has changed the formula for calculating the amount of aid a STUDENT may retain when a STUDENT withdraws. STUDENTS who withdraw from all classes prior to completing more than 60% of a payment period will have their eligibility for Federal Aid recalculated based on the percentage of the payment period completed, which shall be calculated as follows:

$$\frac{\text{\# of calendar days completed by student}}{\text{total \# of calendar days in payment period}}$$

The total number of calendar days in a payment period excludes any scheduled breaks of five (5) days or more.

The Return to Title IV calculation will exclude any break days longer than five. If a student eligible for financial aid attends one day or more, the institution is required to complete a Return to Title IV calculation. Funds will be returned to the federal government if what was received is more than the student is eligible to retain. If the funds received are less than what the student is eligible to retain, the student may qualify for a post-withdrawal of funds. A post-withdrawal is the ability for a student to receive funds after they have ceased attending school. If the student or parent qualifies, they will be notified in writing, indicating the steps required to be completed.

**Please note that students are responsible for any balance owed to LCT as a result of the repayment of Federal Aid funds.*

Refunds will be processed and sent to pupil no later than thirty (30) days after the school determined withdrawal date.

Financial Aid Information

■ The Refund Process

The Return to Title IV calculation will exclude any break days longer than five. If a student eligible for financial aid attends one day or more, the institution is required to complete a Return to Title IV calculation. Funds will be returned to the federal government if what was received is more than the student is eligible to retain. If the funds received are less than what the student is eligible to retain, the student may qualify for a post-withdrawal of funds. A post-withdrawal is the ability for a student to receive funds after they have ceased attending school. If the student or parent qualifies, they will be notified in writing, indicating the steps required to be completed.

1. Unsubsidized Federal Direct Loan
2. Subsidized Federal Direct Loan
3. Federal Direct Plus Loan
4. Federal Pell Grant
5. Academic Competitiveness Grant (ACG)
6. Federal Supplemental Educational Opportunity Grant (FSEOG)

Lincoln College of Technology will distribute any refund proceeds from step two in the following manner. Reduce the outstanding Federal loan obligation first in the order listed above.

The student's eligibility for a state grant and agency funding will be calculated independently of the refund process upon the student's withdrawal from school.

If a credit balance still remains after the above process has been completed, the school will honor the student's authorization to reduce their Federal loan obligation. If the school does not possess a Federal loan reduction authorization, the remaining credit balance will be returned to the student.

■ Veterans Affairs Refund Policy

1. Each postsecondary educational institution shall have a policy for refunds which at least provides:
 - (a) That if the institution has substantially failed to furnish the training program agreed upon in the enrollment agreement, the institution shall refund to a student all the money the student has paid.
 - (b) That if a student cancels his or her enrollment before the start of the training program, the institution shall refund to the student all the money the student has paid, minus 10 percent of the tuition agreed upon in the enrollment agreement or \$100, whichever is less.
 - (c) That if a student withdraws or is expelled by the institution after the start of the training program and before the completion of more than 60 percent of the program, the

institution shall refund to the student a pro rata amount of the tuition agreed upon in the enrollment agreement, minus 10 percent of the tuition agreed upon in the enrollment agreement or \$100, whichever is less.

- (d) That if a student withdraws or is expelled by the institution after completion of more than 60 percent of the training program, the institution is not required to refund the student any money and may charge the student the entire cost of the tuition agreed upon in the enrollment agreement.
2. If a refund is owed pursuant to subsection 1, the institution shall pay the refund to the person or entity who paid the tuition within 15 calendar days after the:
 - (a) Date of cancellation by a student of his or her enrollment;
 - (b) Date of termination by the institution of the enrollment of a student;
 - (c) Last day of an authorized leave of absence if a student fails to return after the period of authorized absence; or
 - (d) Last day of attendance of a student, whichever is applicable.
 3. Books, educational supplies or equipment for individual use are not included in the policy for refund required by subsection 1, and a separate refund must be paid by the institution to the student if those items were not used by the student. Disputes must be resolved by the Administrator for refunds required by this subsection on a case-by-case basis.
 4. For the purposes of this section:
 - (a) The period of a student's attendance must be measured from the first day of instruction as set forth in the enrollment agreement through the student's last day of actual attendance, regardless of absences.
 - (b) The period of time for a training program is the period set forth in the enrollment agreement.
 - (c) Tuition must be calculated using the tuition and fees set forth in the enrollment agreement and does not include books, educational supplies or equipment that is listed separately from the tuition and fees.

■ Other State Cancellation and Refund Policies

A *State Cancellation and Refund Policies* addendum contains detailed information about Cancellation and Refund Policies from other States in which LCT operates and will be supplied to you prior to application submission.

Scheduled class hours are located in the Academic Information section, page 36.

Housing

Lincoln College of Technology is committed to offering housing options to all students who desire housing assistance. The options include very limited on-campus living in residential halls, neighborhood housing, and off-campus apartment housing provided by our student housing partner company. The housing staff will gladly assist students with these options. Student housing is available on a first-come first-served basis. It is highly recommended that you make your reservations and send in the required fees as quickly as possible to secure your preferred housing arrangements.

Career Services

Lincoln College of Technology does not guarantee job placement. However, it does provide employment assistance to its current students and graduates by means of the following services:

- Advises industry leaders of the availability of the school's students and graduates through regular contact, including several scheduled Career Days per year.
- All of the students attending Lincoln College of Technology will participate in our Lincoln Edge program. Lincoln Edge is a combination of interactive workshops and online services that deliver professional skills training on topics like resumé building, personal development, setting goals, job search and interviewing strategies. Students will have a dedicated portal where they can access an array of professional services even after they have graduated from Lincoln! We are dedicated to ensuring that we not only provide our students with the skills they need to perform on the job, but the skills they need to build a lifetime career.
- Provides additional assistance if desired.

Official Student Communication

Lincoln College of Technology's official web-based student portal (**MyCampusLinc**) and student email accounts are an official means of communication to all students enrolled in credit bearing classes. All such students are required to activate **MyCampusLinc** portal and **@mylincoln.edu** email accounts. Official LCT communications may include, but are not limited to, registration information, reminders of important dates associated with key financial aid and financial obligations as well as academic progress notifications.

Lincoln College of Technology expects that students shall receive and read their electronic communications on a frequent and timely basis. Failure to do so shall not absolve the student from knowing of and complying with the contents of all electronic communications, some of which will be time-critical.

Transcripts

Once all graduation requirements have been met, each graduate of the school is provided with a sealed transcript and diploma or degree within thirty (30) days of graduation. If these documents are not received, the graduate has ninety (90) days in which to notify the college so that a no-charge replacement will be made.

Following a review by the School, grade reports (unofficial

transcripts and/or degree audits) are available for the student to review upon completion of each course or term on the student portal. Individual grade records are permanently maintained for each Student and are open for inspection in accordance with the Family Educational Rights and Privacy Act of 1974.

The student will receive an official transcript upon graduation. Requests for official transcripts while in school or additional copies of official transcripts after graduation can be ordered at <https://www.lincolntech.edu/academics/transcripts>. Current students may obtain unofficial transcripts on their student portal account <https://myportal.lincolnedu.com/>. Requests for replacement diplomas/ degrees must be submitted in writing to the school.

School Calendar

Academic Calendar—The academic calendar, including holidays and vacation breaks, may be found in the *Academic Calendar* addendum.

Inclement Weather

In the case of inclement weather or hazardous conditions, an announcement will be made via the LincAlert system. Announcements may include plans for distance learning, delayed start time or early dismissal of class, class cancellation, or school closure.

Student Complaint/Grievance Procedure

Conflicts are best resolved when people utilize basic communication skills, common sense, and discretion. A student whose views differ from those of an instructor should first try to resolve the difference with the instructor involved. If a satisfactory solution cannot be obtained, the student should request an interview with the Department Manager or Academic Dean.

Students who have concerns of a non-academic nature are urged to consult with the office of the Campus President. This office will refer the student to the proper department and will assist the student as necessary.

If a student does not feel that the school has adequately addressed a complaint or concern by following the above measures, the student may consider contacting:

LINCOLN EDUCATIONAL SERVICES PROBLEM RESOLUTION HOTLINE

1-800-806-1921

TENNESSEE HIGHER EDUCATION COMMISSION DIVISION OF POSTSECONDARY STATE AUTHORIZATION

312 ROSA L. PARK AVENUE, 9TH FLOOR
NASHVILLE, TN 37243-1102

(615) 741-3605

Distance Education students residing in other states may contact the Indiana Commission for Higher Education concerning complaints after having completed the institution's student complaint process.

INDIANA COMMISSION FOR HIGHER EDUCATION/ INDIANA BOARD FOR PROPRIETARY EDUCATION 101 WEST OHIO STREET, SUITE 300 INDIANAPOLIS, IN 46204-4206

(317) 232-1033

General Student Information

ACCSC Student Complaint Grievance Procedure

Schools accredited by the Accrediting Commission of Career Schools and Colleges must have a procedure and operational plan for handling student complaints. If a student does not feel that the school has adequately addressed a complaint or concern, the student may consider contacting the Accrediting Commission. All complaints reviewed by the Commission must be in written form and should grant permission for the Commission to forward a copy of the complaint to the school for a response. This can be accomplished by filing the ACCSC Complaint Form. The complainant(s) will be kept informed as to the status of the complaint as well as the final resolution by the Commission. Please direct all inquiries to:

**ACCREDITING COMMISSION OF
CAREER SCHOOLS AND COLLEGES**
2101 WILSON BLVD, SUITE 302
ARLINGTON, VA 22201

(703) 247-4212

www.accsc.org | complaints@accsc.org

A copy of the ACCSC Complaint Form is available at the school and may be obtained by contacting complaints@accsc.org or at <https://www.accsc.org/Student-Corner/Complaints.aspx>

The federal contact for student loan issues is:

POSTAL MAIL	U.S. DEPARTMENT OF EDUCATION FSA OMBUDSMAN GROUP P.O. BOX 1843 MONTICELLO, KY 42633
PHONE	1-877-557-2575
FAX	606-396-4821
WEB	https://studentaid.gov/feedback-center/

Students have the right to file a complaint with the U.S. Department of Education concerning alleged failures by Lincoln College of Technology to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

FAMILY POLICY COMPLIANCE OFFICE
U.S. DEPARTMENT OF EDUCATION
400 MARYLAND AVENUE, SW
WASHINGTON, DC 20202

Other State Student Complaint/Grievance Policy

A State Student Complaint/Grievance Policy Addendum contains detailed information about Student Complaint/Grievance Policies from other states in which LCT operates and will be supplied to you prior to application submission.

Visitors

Parents and other interested persons are welcome to call at any time to confer with school authorities, to inspect the school facilities, or to seek advice on the future career of an enrolled student. Visitors will find a cordial reception at Lincoln College of Technology. An appointment made in advance would be appreciated.

In keeping with Lincoln's safety procedures all visitors must sign-in at the front desk upon arrival to the school and are issued a visitor's badge.

Tools

All tools and materials for the programs must be purchased by the student. Special tools to be used in the program are supplied by the school on a loan basis. To be employable in industry, a graduate must be equipped with his own basic set of hand tools.

If the student does not already have his own tools, they can be purchased from the school or purchased from any outside source of the student's choice. The school cannot assume responsibility for the student's property on or off the school premises.

Any student enrolled in the Automotive, Diesel, Collision, or Heavy Equipment programs and starting classes after January 2, 2023, will be receiving MATCO tools from Lincoln College of Technology (LCT) in the very early stages of the curriculum to be used in your program of study. This MATCO tool program will replace any process previously described or offered through LCT.

Educational Equipment

A portable student owned device (i.e. a laptop) is required in order to access the course companion platform utilized for classroom instruction. There are minimum system requirements that these devices must meet for the learners to have a positive experience. See your Campus Representative to inquire systems requirements necessary to access the program course companion platform.

Academic Information

■ Student Conduct

Students are required to comply with all student and safety regulations. Failure to adhere to and observe school regulations and policy may result in suspension or immediate dismissal. Conduct which may be considered unsatisfactory includes, but is not limited to the following:

- Excessive absenteeism, tardiness or leaving class early. Students are also expected to put forth a reasonable effort to learn. Acts such as loafing, horseplay, failure to pay attention and carry out instructions, or poor attendance are not tolerated. Students who arrive after the official school starting time will be considered as late. If a student must leave prior to the official end of class time, he/she must notify the instructor and/or Education Department. Class attendance is closely monitored by the school, and unless, they contact the school first, students who are absent from class will be contacted.
- Student conduct which disrupts classes or interferes with the progress of other students.
- Theft of property belonging to the School, other students or employees. (In addition to termination, theft may be reported to civil authorities.)
- Any act resulting in defacing or destruction of School property and/or property of others including other students.
- Fighting in or near the school premises.
- Possession or consumption of alcohol, marijuana or illegal substances on or near school premises. Possessing firearms, fireworks, ammunition, or weapons is a violation of schools rules and state laws. (In addition to termination, illegal substance abuse will be reported to proper authorities.)
- Personal conduct at any time or place which may, in the judgment of the School staff, cast a bad reflection on the School and its well-earned reputation.
- We oppose all forms of unlawful discrimination and harassment in the school environment. Harassment and discrimination can take many forms including but not limited to, racial slurs, ethnic jokes, disparaging or insensitive remarks about an individual's religion, age, gender, physical ability or sexual orientation, physical or verbal threats, or sexual harassment. None of these, or any other form of harassment, including cyber-bullying, or discrimination is acceptable in the school environment. All allegations of harassment or discrimination are fully investigated. Students found to have engaged in this behavior are subject to disciplinary action up to and including expulsion from school.
- Any student creating a hazard; immoral conduct, or disturbance in the surrounding neighborhood. Reckless driving and / or squealing tires near the school or places of residence are prohibited.
- The campus computer systems and networks are provided for student use as a part of the academic program. All students have a responsibility to use Lincoln Educational Services computer systems and networks in an ethical and lawful manner. The intentional misuse and abuse of computer and Internet resources is not permitted. This includes, but is not limited to, purposely visiting inappropriate and non-academic Web sites which promote or advocate illegal or unethical behavior; visiting inappropriate and non-academic Web sites for personal business; downloading graphics or other pictures, images, or information not related to academic curricula; inappropriate and non-academic use of email; inappropriate and non-academic use of chat rooms; and inappropriate and non-academic use of school software.

- In keeping with accepted industry and shop safety hazards, jewelry must be evaluated for safety risks when in the lab or shop. Hanging earrings, necklaces, rings, or bracelets may pose a safety risk. If in the judgment of school staff, a safety hazard exists, a jewelry item in question must be either removed or covered with protective clothing.
- The campus has an established a dress code for students in all programs which is in accordance with industry expectations and in consideration of professional standards.
- We expect honesty from students in presenting all of their academic work. Students are responsible for knowing and observing accepted principles and procedures of research and writing in all academic work, including term paper writing, lab manual and/or workbook completion and test taking.
- Misrepresenting the school's programs, policies, or activities of members of the staff or of other students is prohibited.
- Cell phones and/or other electronic recording or communication devices are not allowed to be operated in any classroom or lab area without the expressed permission of the instructor.

■ Dress Standard

In addition to providing the best possible professional education, Lincoln College of Technology recognizes its responsibility to prepare its students to succeed in the workplace. For this reason, Lincoln College of Technology requires students to dress, groom, and behave as if they were already employed. Students are required to wear uniforms and ID badges.

■ Class Schedules

Lincoln College of Technology's training programs are designed to help get you into your career field fast.

You can enroll at any time during the year. Class starting dates are scheduled at frequent intervals to enable you to get moving toward your career goals as soon as possible. Class size is limited to 30 students per class so that each student can receive the personal attention from his/her instructor. A typical lab/shop setting will be limited to 30 students as well.

The class schedules that follow are designed to be flexible and to best utilize facility and instructional time:

Day Schedule (16 hours per week)

Monday through Thursday between 6:45 a.m. and 11:00 a.m.

PLUS approximately 8 hours per week online

Afternoon Schedule (16 hours per week)

Monday through Thursday between 12:15 p.m. and 4:30 p.m.

PLUS approximately 8 hours per week online

Evening Schedule (16 hours per week)

Monday through Thursday between 5:45 p.m. – 10:00 p.m.

PLUS approximately 8 hours per week online

GENERAL EDUCATION COURSES

General Education courses will be offered online.

The school reserves the right to alter hours of attendance and/or starting dates when deemed necessary. Such changes will not alter the program costs or refund policy stated in the enrollment agreement. If conditions beyond the control of the college require postponement of a starting date or temporary suspension of classes, appropriate adjustments will be made to provide students with all the instruction to which they are entitled under the terms of the Enrollment Agreement.

Students who have enrolled but have not started attending school will, upon request, be issued a refund of monies paid if postponement of classes extends beyond the next class starting date. For specific start and end dates see the school calendar addendum.

Academic Information

■ Consultation and Tutoring

Students and graduates may consult with the School faculty at any time about program or course problems. Students who require additional assistance with their work may obtain individual tutoring from the faculty outside of class hours. Arrangements for special tutoring must be made with the campus Education Department.

■ Student Advising

The Education Department monitors student success as measured by student attendance, student learning, professionalism, academic progress, and achievement of career goals. As a student service, Department personnel engage active students in advising sessions to mitigate obstacles or challenges, identify additional needed supports or services, and promote student success. Students are encouraged to call upon staff to address academic or non-academic concerns. Matters of a personal nature that distract the learning experience may be addressed through advising practice or through referral to qualified professionals in the local community. Good communication is imperative for effective advising; therefore, active students are asked to inform staff of any changes to their records including phone, home address, e-mail, employment, marital status, and so forth.

■ Americans with Disabilities Act (ADA) Policy

Lincoln College of Technology (LCT) is committed to providing opportunities for all qualified students to participate in its programs, including students with disabilities who need reasonable accommodations. A qualified student is one who, with or without reasonable accommodation, meets the essential institutional, academic and technical standards requisite to admission, participation and completion of our programs.

A reasonable accommodation is an accommodation that allows a student with a disability to participate in our programs without changing the essential academic requirements of our programs, creating a threat to others or placing an undue burden on the institution.

An example of a reasonable accommodation is giving students with certain learning disabilities additional time to take an exam. Accommodations are provided to allow a student to participate in our programs but LCT does not provide personal assistants such as aides who help with dressing, feeding and the like.

A disability is a physical or mental impairment that substantially limits one or more major life activities such as seeing, hearing, walking or learning.

All requests for reasonable accommodation must be submitted to the Academic Dean. While a student may discuss a possible accommodation with any faculty or staff member, students should be aware that faculty and staff are not authorized to provide accommodations. All inquiries from students about reasonable accommodation should be directed to the Academic Dean, who will then evaluate the request and make a decision. The complete policy can be found by visiting:

www.lincolntech.edu/consumerinfo.

■ Attendance Policy

The technical nature of the training and graduate employability goals of the programs offered requires that students attend classes on a regular basis. Our expectation is that students will attend all sessions for courses in which they are registered. Class attendance is monitored daily commencing with the student's first official day of attendance and a student will be considered withdrawn from a course or courses when any of the following criteria are met:

- The sixth consecutive day of absence from classes;
- The fourteenth consecutive calendar day of absence (two weeks);

- Cumulative absences prevent the student's ability to master the course content during the remainder of the scheduled course, term, or semester as determined by the course syllabus.

Approved employment interviews (established per school policy) are not counted as absences for attendance purposes.

The following documented absences may be considered on appeal. If approved, the student will be allowed to make up any work missed, however, the make-up time cannot be applied to their course attendance percentage:

- **Court Appearance** - Applicable only when a student is mandated to appear in court for an action in which he/she is a third party or witness. Documentation will be required.
- **Military Duty** - All military personnel requesting a documented absence must submit a copy of their orders to the campus Education Department prior to the missed time.
- **Illness** - In the event a student suffers personal illness, either a written doctor's note excusing participation in school or documentation of the stay in the hospital will be required.
- **Bereavement** - In the event of the death of an immediate or extended family member and not to exceed 4 days or 25 % of the scheduled course. Documentation (e.g. - newspaper notice, funeral notice, obituary, or church handout) is required.
- **Jury Duty** - Documentation required (stamped jury duty form from court).

Documentation of the above approved absences should be presented to the Education Department upon returning to school or in advance when applicable.

Cases of extenuating circumstances may be considered by the Campus President or designee and in the form of signed documentation or verifiable email from the student and if the student demonstrated comprehension of the course content missed.

Students receiving funds from any state or federal agency may be subject to the additional attendance requirements of that specific agency.

A Pending Course Schedule (PCS) student status is a temporary period of non-attendance not to exceed a maximum of 60 calendar days. The status is intended to support student progression and is applied when a student has a course that is not available due to, but not limited to, interruption in their enrollment because of a course failure, a shift change, a leave of absence, or failure to meet graduation requirement. The PCS status is not included in the 150% maximum timeframe calculation.

Note: Calendar day calculations include all days visible on a calendar without exception.

■ Blended Delivery

ATTENDANCE FOR BLENDED PROGRAMS (WHERE APPLICABLE):

Blended courses consist of both classroom and online instruction. Students are expected to adhere to the attendance policy through physical attendance in scheduled class sessions AND through online graded assignments submitted weekly. Timeframes for weekly online submissions are designed in the Canvas Course Shell (i.e. Sunday - Saturday). Threaded discussions and reflection exercises are examples of graded assignments used to record weekly attendance for the online portion.

Sending an email to the instructor does not count as an academic activity or a gradable item. Meeting the attendance requirements does not indicate that the student has completed all of the required class work for a particular week. Meeting the attendance requirements indicates only that the student has participated sufficiently to be considered in attendance for that week. Assignments are graded on their merit and according to the established guidelines.

Academic Information

BLENDING DELIVERY METHOD TECHNICAL REQUIREMENTS

COMPUTER REQUIREMENTS FOR BLENDED DELIVERY ONLINE COURSES

The minimum system requirements are meant to serve as a guideline for what is acceptable to access the online courses using technology.

Minimum System Requirements:

- Microsoft Office 2016 or Higher
- Windows 10 Operating System
- 4G RAM minimum
- 40GB of AVAILABLE hard-disk space
- Speakers and Sound Card
- High speed connection to the Internet (DSL, Cable)

Supported Browsers: *(These requirements are subject to change. In each case, the latest two versions of each browser should be supported unless more specific requirements are outlined in your program. It is recommended that students have at least two of these available on their systems.)*

- Internet Explorer 11, Microsoft Edge
- Firefox (Latest version recommended)
- Chrome (Latest version recommended)
- A user risks running into problems with the course software if they choose to use a non-supported browser

Browser settings:

- Java Script should be enabled
- Cookies should be enabled
- Allow Pop-Up in windows

The following plug-ins are required for many of the resources available in your online courses:

- Adobe Flash Player
- Adobe Acrobat Reader
- Java 1.5 or higher

Make-Up Work

Make-up work is only permitted when a student has a documented absence. The documented absence form must be approved by the campus Education Department before the assigned work will be accepted for a grade. Make-up work may only be used to affect a course grade. Make-up work may not be used to raise attendance percentage in a course. Make-up work must be completed in the timeframes required to process Grade Appeals and/or Incomplete Grades, and must be specifically for assignments missed while out for a documented absence.

In the case of school closure due to inclement weather or other natural disaster, make-up sessions will be scheduled to present and/or review material not incorporated into the remaining scheduled days. The campus will attempt to schedule make-up classes at times that fit within the students' schedule.

Course and Academic Measurement

The instructional hours listed for each of the programs in this catalog are included in compliance with State and Veteran's training requirements and are predicated on regular attendance, successful completion of each course in the program without repetition or make-up work, and excluding holidays that occur during the period of attendance. An instructional hour is defined as a minimum of 50 contact minutes within any scheduled 60 minute period.

A credit hour is defined as an amount of work represented in intended learning outcomes and verified by evidence of student achievement for academic activities as established by the school comprised of the following units: didactic learning environment; supervised laboratory setting of instruction; externship; and/or out-of-class work/preparation.

Grading Policy

Grading is based on the student's class work and lab/shop work, and the results of written and performance tests. An average is taken of all grades in any marketing period and must be at the specified CGPA or above to be considered making satisfactory academic progress.

Percentage	Letter Grade	Interpretation	Point Value
95-100	A	Excellent Plus	4.0
90-94	A-	Excellent	3.9
87-89	B+	Good Plus	3.8
84-86	B	Good	3.5
80-83	B-	Good Minus	3.0
77-79	C+	Average Plus	2.8
74-76	C	Average	2.5
70-73	C-	Average Minus	2.0
67-69	D+	Below Average	1.5
64-66	D	Poor	1.2
60-63	D-	Poor	1.0
59 and below	F	Failing Work	0.0
Incomplete	I	Temporary grade; Is not considered in computing Grade Point Average; Requires make-up work.	N/A
Withdrawal	WA	Received by students who withdraw from a course before the end of the add/drop period.	N/A
Withdrawal	W	Withdrawal after the add/drop period.	N/A
Pass	P	Received by students in Internship/ Externship or Developmental Courses. "P" is not considered in computing the Grade Point Average.	N/A
Non-Pass	NP	Received by students in Internships/ Externships and Developmental Courses.	N/A
Repeat Course	**	Received by students who repeat a course.	N/A
Repeat Course Required	R	Received by students when their grade does not meet a course requirement or programmatic standard	N/A
Transfer Credit	TR	Indicates the school accepted credit earned for previous postsecondary education at an institution other than a Lincoln Educational Services School. "TR" is not considered in computing the Grade Point Average.	N/A
Test Out Credit	TO	Indicates the school accepted credit earned for testing out of a course. "TO" is not considered in computing the Grade Point Average.	N/A

Academic Information

Grade Appeal Policy

Any student wishing to have a course grade reviewed must appeal in writing within 10 days after the final grade has been assigned. Grade Appeal Forms are available from the Education Office. Initially the appeal should be given to the faculty member who awarded the grade. If satisfaction is not obtained, the student should then appeal to the Academic Dean, who after reviewing with an Academic Review Panel, will respond in writing with a binding decision.

Satisfactory Academic Progress (SAP)

INTRODUCTION

Federal regulations require the Institution to monitor the academic progress of each student who applies for financial aid and to certify that each student is making satisfactory academic progress toward a degree, diploma or certificate. In accordance with those regulations, the Institution has established standards of Satisfactory Academic Progress (SAP) that include qualitative, quantitative and incremental measures of progress. Students bear primary responsibility for their own academic progress and for seeking assistance when experiencing academic difficulty. Academic advisement, tutoring, and mentoring programs are all available.

QUALITATIVE MEASURE OF PROGRESS (GRADE POINT AVERAGE)

All students are required to meet the minimum cumulative grade point average (CGPA) shown on the chart below. Grades ranging from "A" to "F" will be included in the CGPA calculation.

QUALITATIVE MEASURE OF PROGRESS (GPA)	
PROGRAM INTERVALS (Based on Total Published Program Credits)	MINIMUM REQUIRED GRADE POINT AVERAGE
BELOW 25%	1.25
25% TO <50%	1.50
50% TO <75%	1.75
75% AND ABOVE	2.00

QUANTITATIVE MEASURES OF PROGRESS (PACE OF PROGRESSION AND MAXIMUM TIME FRAME)

PACE OF PROGRESSION ("PACE")

The institution has established a minimum pace of progression for all enrolled students as outlined in the table below. Grades of "F", "I", "W", (or blank/missing) are treated as registered credits but NOT earned credits and thus negatively impact the pace of progression.

QUANTITATIVE MEASURES OF PROGRESS (PACE)	
PROGRAM INTERVALS (Based on Total Published Program Credits)	MINIMUM GRADE POINT AVERAGE
BELOW 25%	50%
25% TO <50%	66.67%
50% TO <75%	66.67%
75% AND ABOVE	66.67%

The formula used to calculate the Minimum Pace of Progression will vary depending on the program of study as noted below.

MINIMUM PACE OF PROGRESSION	
PROGRAM STANDARD	FORMULA
CREDIT HOURS	$\frac{\text{cumulative earned credits}}{\text{cumulative registered credits}}$
CLOCK HOURS	$\frac{\text{cumulative earned hours}}{\text{cumulative registered hours}}$

MAXIMUM TIME FRAME

All financial aid recipients are expected to complete their degree/diploma/certificate within an acceptable period of time. The maximum time frame for financial aid recipients is 150% of the published length of the program. For students enrolled in credit hour programs, the MTF is based on 150% of the minimum required credits for graduation as published in the catalog. For students enrolled in clock hour programs the MTF is calculated as 150% of the clock hours required for successful program completion as published in the catalog.

EVALUATION PERIOD

In order to maintain eligibility for Title IV funding, students must maintain satisfactory academic progress.

FAILURE TO MEET STANDARDS

SAP/FA WARNING

- If at the end of the evaluation period a student has not met either the GPA or pace of progression standard, the student will be placed on warning for one evaluation period. Students on warning are eligible to register and receive financial aid.
- If at the end of the warning period a student who has been on warning has met both the cumulative GPA and cumulative pace standards, the warning status is ended and the student is returned to good standing.

SUSPENSION OF STUDENTS ON SAP/FA WARNING STATUS

If at the end of the warning period a student who has been on SAP/FA Warning status has not met both the cumulative grade point average and minimum pace of progression standards, the student shall be placed on SAP/FA Suspension. Students on SAP/FA Suspension are not eligible to receive financial aid.

SUSPENSION OF STUDENTS NOT ON SAP/FA WARNING STATUS

- Suspension for Exceeding the Maximum Time-Frame.** If at the end of the evaluation period a student has failed to meet the institution's standard for measurement of maximum time-frame, the student shall be suspended from financial aid eligibility and may be subject to dismissal.
- Suspension for Inability to Meet Program Requirements within the Maximum Time Frame.** If at the end of the evaluation period the institution determines it is not possible for a student to raise her or his CGPA or pace of progression percentage to meet the institution's standards before the student completes his/her program of study, the student shall be suspended from financial aid and may be subject to dismissal.
- Suspension for Extraordinary Circumstances.** The Institution may immediately suspend students in the event of extraordinary circumstances, including but not limited to previously suspended (and reinstated) students whose academic performance falls below acceptable standards during a subsequent term of enrollment; students who register for

Academic Information

courses, receive financial aid, and do not attend any classes; and students whose attendance patterns appear to abuse the receipt of financial aid and may be subject to dismissal.

APPEALS AND PROBATION

APPEALS

A student who fails to make satisfactory academic progress and is suspended has the right to appeal based on special, unusual or extenuating circumstances causing undue hardship such as death in the family, student's injury or illness or other special circumstances as determined by the institution.

- Appeals must be submitted in writing.
- The appeal must include an explanation of the special, unusual or extenuating circumstances causing undue hardship that prevented the student from making satisfactory academic progress.
- The appeal must also include what has changed in the student's situation that would allow the student to demonstrate satisfactory academic progress at the end of the next evaluation period.
- Supporting documentation beyond the written explanation is required.
- Initial consideration of appeals will be undertaken by the Appeal Committee which will minimally consist of the Academic Dean, and /or the Financial Aid Representative. The Campus President may appoint additional members as deemed appropriate.
- Appeals that are approved must contain an academic plan that, if followed, ensures the student would be able to meet satisfactory academic progress standards by a specific point in time.

SAP/FA PROBATIONARY STATUS

A student who has successfully appealed shall be placed on SAP/FA Probation for one evaluation period. If, at the end of the next evaluation period, a student on SAP/FA Probation status:

- Has met both the institution's cumulative grade point average and pace standards, the student shall be returned to good standing.
- Has not met the institution's cumulative grade point average and pace standards but has met the conditions specified in his/her academic plan, the student shall retain his/her financial aid and registration eligibility under a probationary status for a subsequent evaluation period.
- Has not met the institution's cumulative grade point average and pace standards and has also not met the conditions specified in his/her academic plan, the student shall be re-assigned a SAP/FA Suspension status immediately upon completion of the evaluation.

NOTIFICATION OF STATUS AND APPEAL RESULTS

STATUS NOTIFICATION

Students are notified in writing (letter or email) when the evaluation of satisfactory academic progress results in warning, suspension, or probation. The notice includes the conditions of the current status and the conditions necessary to regain eligibility for registration and financial aid. Notice of suspension also includes the right and process necessary to appeal suspension.

APPEAL RESULT NOTIFICATION

Students are notified in writing (letter or email) of the results of all appeals. Approved appeals include the conditions under which

the appeal is approved and any conditions necessary to retain eligibility for registration and financial aid. Denied appeals include the reason for denial.

REINSTATEMENT

A student who has been suspended from financial aid eligibility may be reinstated after an appeal has been approved or the minimum cumulative GPA and pace standards have been achieved. Neither paying for their own classes nor sitting out a period of time is sufficient in and of itself to re-establish a student's financial aid eligibility.

TREATMENT OF GRADES AND CREDITS

Credits: The unit by which academic work is measured.

Registered (Attempted) Credits: The total number of credits for which a student is officially enrolled in each term.

Cumulative Registered Credits: Cumulative registered credits are the total number of credits registered for all terms of enrollment at the Institution, including summer terms and terms for which the student did not receive financial aid.

Earned Credits: Earned credits include grades ranging from "A" to "D-" and "P". They are successfully completed credits that count towards the required percentage of completion (66.67%) as defined by the quantitative measure.

Attempted, NOT earned: Grades of "F", "I", "NP", "W" (or a blank/missing) will be treated as credits attempted but NOT successfully completed (earned).

Audited Courses: Audited courses are not aid eligible courses and are not included in any financial aid satisfactory academic progress measurements.

Repeat Credits: Repeat credits are credits awarded when a student repeats a course in order to improve a grade. A student may repeat a class as allowed by the institution. The institution will use the highest grade achieved to calculate GPA. All repeated credits are included in the percent of completion and maximum time frame calculations.

Transfer Credits: Transfer credits are credits earned at another postsecondary educational institution which are accepted by this Institution. Transfer credits which are accepted by the Institution and are applicable to the student's program of study shall be counted as credits attempted and completed for calculation of pace of progression and maximum time frame. Grades associated with these credits are not included in calculating CGPA.

For students who either change programs within the institution or wish to earn an additional credential, all credits earned toward courses that apply to a student's new program of study or credential will be used to determine satisfactory academic progress.

Withdraw: The mark of "W" (withdrawal) is assigned when a student withdraws from a class after the add/drop period or has not satisfied the requirements of an "I" grade within a defined timeframe. It is not included when calculating grade point average or earned credits. Thus, it does not impact CGPA but does negatively impact earned credits and, therefore, negatively impacts the student's percent of completion.

The mark of "WA" is assigned when a student withdraws from a class before the end of the Add/Drop period. It is not included when calculating grade point average or earned credits. Thus, it does not impact CGPA and does not negatively impact earned credits and, therefore it does not impact the student's percent of completion.

Incompletes: The mark of "I" (incomplete) is a temporary grade which is assigned only in exceptional circumstances. It will be given only to students who cannot complete the work of a course on schedule because of illness or other circumstances beyond their control. An "I" grade will automatically become a "W" grade if requirements to complete course work have not been satisfactorily met within 14 days of the original course end date. Instructors have

Academic Information

the option of setting an earlier completion date for the student. A grade of "I" is not included when calculating grade point average or earned credits. Thus, it does not impact CGPA but does negatively impact earned credits and, therefore, negatively impacts the student's percent of completion.

Add/Drop Period: The add/drop period is the span of time when students may be added or removed from a course. A student may be added or removed from a course on or before the third scheduled class session. Only in-person sessions are calculated in the three day add/drop period count with the exception of fully online offerings. A student being added to a course will be recorded as absent for any sessions missed and allowed make-up work. A grade of "WA" will be applied when a student has recorded attendance and is withdrawn during the add/drop period.

■ Satisfactory Academic Progress for VA Beneficiaries

In accordance with the requirements set forth by the Department of Veterans Affairs, the school will notify the VA within 30 days of any VA beneficiaries who are placed on SAP/FA Warning for a 2nd consecutive term. This notification will include the date at which the student will be placed on SAP/FA Suspension. Students in SAP/FA Suspension are considered ineligible for VA Educational Assistance benefits and as such the School VA Certifying Official will no longer be permitted to certify the student's enrollment for any training towards the remaining requirement of his/her program which he/she completes before being readmitted to the approved program. VA students may avail themselves of the school's appeals process.

■ Withdrawals and Incomplete Grades

A "W" withdrawal is issued to students who are withdrawn from the institution or course after the introductory period of enrollment and prior to the end of the module or term. Readmitted students must retake all "W" withdrawal graded courses. A "W" will not be calculated in the cumulative GPA, but counts as an attempt for satisfactory academic progress.

An "I" incomplete is given to students who do not complete a test or required course work due to an approved documented absence on file. The student has a maximum of 14 days to complete the course work, the school may require less time in certain circumstances. If the coursework is not completed in the specified time, the student will receive a zero for the assignment which will be averaged into the G. P. A.

The mark of "WA" is assigned when a student withdraws from a class before the end of the Add/Drop period. It is not included when calculating grade point average or earned credits. Thus, it does not impact CGPA and does not negatively impact earned credits and, therefore it does not impacts the student's percent of completion.

■ Course Repeats

Based on scheduling availability, a student will be allowed to repeat one failed course; or a course that falls below a programmatic standard, at no additional tuition charge provided the student graduates and provided the repeat will not prevent the student from completing the program in the maximum time permitted by the School's Satisfactory Academic Progress policy. If the student fails or falls below a programmatic standard in more than one course within the term, the free course repeat will apply to the course with the higher number of hours. Students who fail (or fall below a programmatic standard) the same course twice will be terminated except in the case of verifiable extenuating circumstances. In such cases, a student may be granted permission by the Education Department to enroll in the course for a third time if the circumstances are thoroughly documented.

■ Official and Unofficial Withdrawals

An official withdrawal is initiated by the student. Any student considering to officially withdraw from a program should speak to his/her Education Department Manager as soon as possible. If the student ultimately decides to officially withdraw, it is requested that the student submits their intent to withdraw with their reasons in writing to the Education office.

Prior to the official withdrawal, the student should participate in exit interviews with the Education and Financial Aid Department Managers to review options for returning to school and financial responsibility.

An unofficial withdrawal is initiated by the campus staff. Any student who fails to notify the school of their intent to withdraw and violates the attendance policy or fails to return from a scheduled leave will be withdrawn. Unofficial withdrawals may be initiated by the school due to violations of the student conduct policy, as published in the catalog, that reasonably warrant expulsion (e.g. fighting, having a weapon on site, activities of academic dishonesty). Notification of an unofficial withdrawal will be sent to the student.

■ Withdrawal

Any student considering withdrawing from a program should speak to his or her Admissions Representative as soon as possible. If a student ultimately decides to withdraw from that program, it is requested that a withdrawal form be filled out in the Education Office stating his or her intent to withdraw and his or her reasons. Prior to withdrawal, the student should have an exit interview with the Education Supervisor and a Financial Aid exit interview.

■ Leave of Absence

The granting of a Leave of Absence (LOA), which may be issued to students for reasons such as, but not limited to, personal, professional, medical or financial hardship, must be approved in accordance with guidance in accreditation, state and federal regulations. In compliance with these regulations a student may be granted a number of Leaves during any twelve month period provided that the cumulative number of days of LOA's do not exceed 180 calendar days. The length of any one LOA is at the discretion of campus management. The student must state the specific reason for the LOA on the Leave of Absence Request Form, and have an exit interview with the Education Department to determine what is in the best interest of the student.

If the leave of absence from school exceeds the officially approved date of return the student will be withdrawn from school and any refunds, if applicable, will be issued within 30 days after the effective date of withdrawal. Any unearned financial aid credited to the student's account will be refunded. Reinstatement of financial aid will require a new application and routine processing time. In addition, the student will be required to complete a new enrollment agreement (contract) at the tuition rate in effect on the date of re-application.

■ Transfer Credits

The school's programs are career oriented in nature with objectives designed to prepare graduates for immediate employment in their chosen field of study upon graduation. Students seeking to continue their education at other post secondary institutions should be aware that the school does not claim or guarantee that credit earned here will transfer to another institution and acceptance of the credit earned here is determined at the sole discretion of the institution in which the student desires to transfer his/her credits. Students are advised to obtain information from all institutions they are considering attending in order to understand each institution's credit acceptance policies. It is the student's

Academic Information

responsibility to confirm whether or not credits earned at this campus will be accepted by another school.

Students who transfer credits from a postsecondary institution accredited by an agency recognized by the U.S. Department of Education will receive a grade of TR on their transcripts. Those courses which have been accepted as transfer credit are not included in the cumulative grade point average (CGPA) calculation but are calculated towards the maximum time frame to be used to determine a student's satisfactory academic progress. Courses that are the same (Course code, Course Name, Credits and Description) that are transferred from one Lincoln campus to another, will be calculated within the student's CGPA to the new campus. This is determined by the campus administrator within the campus system.

Applicants requesting transfer credits must apply prior to starting school.

For Veterans Affairs Students: VA regulation (Title 38, Code of Federal Regulations, Section 21.4253 (d)(3) and 21.4254(c)(4)) requires that Lincoln Tech receive and evaluate all post-secondary prior credits for all students receiving educational benefits from the Veterans Affairs education programs (CH30, CH33, CH35, CH1606, CH31, and VR&E) which includes prior military service through the evaluation of your military transcripts.

Transfer applicants must submit a transcript from their former institution that clearly indicates the courses taken, grades achieved and credits awarded. All credits transferred from applicable courses must have an earned grade of "C" or better. Or, the applicant must produce an up-to-date professionally recognized certification along with a verifiable history of employment relating to the course.

Regardless of the number of transfer credits awarded, all students must complete a minimum of 50% of the credits required for graduation through actual attendance for all programs taken.

Those students who transfer credits from an accredited postsecondary institution will receive a grade of TR as noted in the grading policy. For students who change programs, only those courses that count towards a student's new program of study will be used to determine satisfactory academic progress.

The Education Department manager receives and evaluates the student transcript and any related support materials (such as a school catalog and / or course syllabi) to determine where prior learning is a match to school course offerings. There are a variety of considerations when evaluating submitted records (i.e. institution, course title, course level, course descriptions, grades, and year of study). Where needed, a campus subject matter expert will participate in the evaluation process. The goal is to ensure student academic success; therefore, an approved transfer of credit is a result of verified evidence of student learning which aligns with school offerings. When further assessment of student learning may be needed, the school may consider the option of test out.

Student applicants with evidence of prior work experience directly applicable to the program may choose to submit their documentation for review. Such applicants will have their skills and knowledge validated through a test out procedure.

TEST OUT

Test Out exams provide students the opportunity to be exempt from certain required courses by demonstrating proficiency through assessment in the subject area to verify knowledge and skill. Applicants requesting to take a test out exam must do so prior to starting school. Not all courses are eligible for test out exam credit, and students cannot have attended past the add/drop period in the course for which they want to test out. To receive credit for a course, the student must earn a B on the test out exam on the first attempt. A successful Test Out result is recorded as "TO" on the student transcript and is not considered in computing the Grade Point Average. A nominal administrative fee may apply for Testing Out. Applicants interested in Test Out should see the Education Department Manager.

When a student transfers from one Lincoln program to another Lincoln program, an evaluation is performed of all courses passed and skills / knowledge obtained which may be applicable to the new enrollment. Where course equivalencies are established, the earned grade in the original enrollment is applied to the new enrollment. A grade of "TO" for test out is applied to a course in the new Lincoln enrollment when it is evident that the required skills and knowledge sets had been obtained across multiple passed courses in the original enrollment.

Appointment for Advanced Standing Tests must be scheduled prior to starting classes. Tuition will be adjusted accordingly.

Re-entrance Policy

Students requesting readmission following an interruption in classes, and students who fail to re-enter on the scheduled time following an authorized leave of absence must re-enroll under the current effective school Enrollment Agreement reflecting revised prices, if applicable. The school reserves the right to limit re-entries. Note: The student's SAP status will be re-calculated and the appropriate status applied to the student's enrollment record.

Students are allowed no more than two interrupts. To re-enter a second time, a student may be readmitted where documented extenuating circumstances exist. An appeal letter must be presented to the Education Department for review. If the Education Department determines that re-admittance is justifiable, the student may be readmitted only after meeting with the Education Department. This signed document must remain in the student's file. A student may not be readmitted a third time unless documented extenuating circumstances exist as determined by the Education Department.

Students, who are terminated by the school for disciplinary reasons or academic deficiencies, may request re-entrance. Such a request must be by letter to the school's Campus President. The letter must set forth valid reasons for granting the request. The request will be reviewed by the Re-entry Committee, and the student will be notified of the Committee's decision.

Requirements for Graduation

The following requirements must be met in order to qualify for a diploma or degree.

1. Successfully complete all required courses in the program.
2. Achieve an overall Grade Point Average of 2.0.
3. Meet satisfactory academic progress requirements.

■ Meet Our School Staff and Instructors

Our Student Services Department will assist active students with non-academic matters relative to school attendance. Students should feel free to call upon the staff of this department and to keep them advised of changes in home address, employment, marital status, etc. during their attendance.

Education Supervisors are available to assist students with academic concerns.

Our instructors are proven professionals, each selected because of their knowledge of the subject matter gained through years of experience in the field. Passing the benefit of years of experience on to you is each instructor's prime concern. Equally important, our instructors are pros in the classroom, shop, or lab, each has proven his/her teaching capability by successfully completing a comprehensive Instructor Training Program. In addition, participation in our In-Service Instructor Training Program is required insuring the continuation of our quality teaching standards. Please refer to our *Instructor List* catalog addendum for a list of names and titles of our staff.
