

Student Outcomes Disclosures

Campus Program Offerings

- Diesel and Truck Technology
- Diesel and Truck Technology with Transport Refrigeration

Glossary of Terms

The student outcomes disclosures presented here are intended to assist you in making an informed decision about your educational future. In accordance with federal regulations, we have compiled pertinent information regarding the cost of the program, typical financing options and obligations of our graduates; and the success of our graduates with respect to on-time completion rates and securing employment. We have presented the data on both an individual campus basis and where applicable, on an OPEID level whereby results are combined for all branch campuses affiliated with that campus.

Keep in mind, the information provided is based on current and historical data and does not constitute a promise or guarantee of future performance. Additionally, there are many factors which can impact the amount of time required to complete a program, the amount of debt that a student may incur; and/or a student's success in finding employment after graduation. Our campus representatives are available to discuss any questions you may have.

Student Outcomes Disclosures

Diesel And Truck Technology (Diploma)		
CIP Code	47.0605	Diploma
Normal Time Completion Rate provides an indication of how many graduates were able to fulfill the program requirements within the published timeframe.		
South Plainfield Campus	Total Grads	145
	Students who completed within Normal Time	79%
	Students who completed within 150% of Normal Time	95%
Median Loan Debt is an indicator of the typical outstanding debt obligations of students at the time of graduation.		
South Plainfield Campus	Federal Loans	\$11,941
	Institutional Loans	\$2,132
	Private Loans	\$7,840
For more information on the Jobs and Career Profiles related to this program, please click on the link below to access the O*NET website sponsored by the US Department of Labor.		
SOC Code Description	Bus and Truck Mechanics and Diesel Engine Specialists	49-3031
Click on the link below to access the most current information regarding the Total Tuition and Fees for this program, including books and supplies, and estimated costs if room and board is available at the campus.		
Program Tuition	Diesel And Truck Technology	
Placement Rates are an indicative of our graduates' success in securing employment in career-related positions. The methodology for calculating these rates is defined in the glossary.		
Placement Rates	ACCSC Program Employment Rate as reported in the 2011 Annual Report	94%

Placement Rates are an indicative of our graduates' success in securing employment in career-related positions. The methodology for calculating these rates is defined in the glossary.		
Placement Rates	ACCSC Program Employment Rate as reported in the 2011 Annual Report	91%

Glossary of Terms

- CIP Code:** The Classification of Instructional Programs (CIP) is a coding system for all post-secondary instructional programs/fields of study that facilitates the organization, collection and reporting of program data. The CIP was developed by the US Department of Education's National Center for Educational Statistics (NCES) and is the accepted federal government statistical standard on instruction program classifications and is used in a variety of educational information surveys and databases
- Normal Time Completion Rate:** Of the students who graduated between 7/1/10 and 6/30/11, what percentage was able to fulfill the program requirements within the timeframe as published in the school catalog.
- 150% of Normal Time:** This measure is calculated by using the same cohort of graduates in the Normal Time Completion Rate and expanding the parameter to account for those graduates who completed the requirements within 1.5 times the program timeframe published in the school catalog. For example, if a student completed a 30 week program in 45 weeks, that would constitute completion within 150% of normal time
- Median Loan Debt:** The median is the middle number in a given sequence of numbers arranged in ascending order (e.g. 5 is the median of 1, 2, 5, 7, 8). In the case of a series with an even number of data points, the median is the average of the two middle numbers (e.g. 6 is the median of 1, 2, 4, 8, 9, 10). Median Loan Debt is a measure of the outstanding loan obligations of those students who graduated between 7/1/10 and 6/30/11. This includes federal, institutional and private loans incurred by these students in financing their educational program of study. Loan debt will vary from student to student based on individual factors such as the student's decision to pay for the program from sources other than student loans or to borrow more than is needed to pay for the direct costs of education.
- SOC Code:** The Standard Occupational Classification (SOC) codes are used by Federal agencies to classify workers into occupational categories. By clicking on the occupational profiles published in the program disclosure page, individuals will be redirected to the O*Net website where additional information regarding the jobs and career profiles for this educational program can be found. Certain programs may be associated with multiple occupational profiles (SOC Codes).
- Program Tuition:** Program Tuition information is provided to inform prospective students of the current cost of the academic program assuming normal time to completion. The Total Tuition and Fees includes all books and supplies required of students. The school reserves the right to adjust the tuition and fees in accordance with applicable statutes and regulations.

Glossary of Terms *(cont'd)*

7. Placement Rates

ACCSC or Accrediting Commission of Career Schools and Colleges placement rates are based on program length in months. To determine the cohort date range, the ACCSC calculation counts backwards from the report date as follow: program length times 1.5 plus 3 months for placement activity. As a result, the grad cohort group will vary by program and is not likely to be to same as the grad cohort group used in other outcomes measures reported in these disclosures.

ACICS or Accrediting Council for Independent Colleges and Schools placement rates are based on graduates between 7/1/10 and 6/30/11 with placements through 9/15/11.

ABHES or Accrediting Bureau of Health Education Schools placement rates are based on graduates between 7/1/10 and 6/30/11 with placements through 10/31/11.
